I am writing to apply for KYC / AML / Compliance opportunities within your organization. With over seven years of experience delivering end-to-end KYC and AML operations in global banking environments, I bring strong expertise in corporate and financial institution KYC, regulatory alignment, and risk-based decision-making.

I currently work as a KYC & AML Associate at Deutsche Bank (DBOI), where I manage the full KYC lifecycle for global corporate portfolios, including onboarding, remediation, periodic refresh, and event-driven reviews. My role involves conducting CDD and EDD, validating complex UBO structures, assessing Source of Funds and Source of Wealth, and ensuring accurate FATCA/CRS classifications in line with internal AML policy and EU regulatory expectations.

I have extensive hands-on experience with sanctions, PEP, and adverse media screening using industry-standard tools including Fircosoft, Dow Jones, LexisNexis, RDC, and Volcker. I document clear screening dispositions, escalation notes, and defensible risk rationales while maintaining audit-ready KYC files. Through effective prioritization and stakeholder coordination, I consistently close 3–5 end-to-end corporate onboarding cases per week, improving SLA compliance and reducing case ageing.

Previously, at MUFG, I led FI KYC reviews for banks, NBFCs, insurers, and mutual funds, supporting both onboarding and periodic refresh cycles across multiple jurisdictions. I reviewed Wolfsberg CBDDQ and FCCQ questionnaires for correspondent banking relationships and monitored event-driven triggers to ensure timely regulatory action. By optimizing workload distribution and delivery planning, I contributed to 15–25% reductions in queue ageing and improved turnaround times.

My experience also includes a QA and controls role at Goldman Sachs, where I designed QA frameworks, sampling methodologies, and MI dashboards to strengthen control discipline and reduce repeat defects. Earlier in my career at Yes Bank, I handled corporate KYC onboarding and account services, gaining strong exposure to client outreach, documentation governance, and regulator-ready file maintenance.

Across all roles, I am recognized for my ability to translate regulatory requirements into practical KYC checklists, clear risk narratives, and consistent review standards, supporting both operational efficiency and regulatory integrity. I work closely with compliance, operations, QA, and front-office teams to unblock dependencies and deliver outcomes within strict SLAs.

I hold an Executive MBA in Business Analytics, complementing my compliance background with strong analytical and reporting skills. I am fluent in English (C1) and have intermediate working proficiency in German (B1), and I am actively strengthening my language skills to integrate effectively into a German professional environment.

I am highly motivated to pursue a long-term KYC-focused compliance career in Germany's regulated banking or fintech sector, where I can contribute to robust KYC and AML frameworks, regulatory integrity, and effective risk management. I would welcome the opportunity to further discuss how my KYC, due diligence, and screening expertise aligns with your team's objectives.

Thank you for your time and consideration.

Sincerely,
Sumesh Kumar
