Dear Hiring Manager,

I am writing to express my interest in UI/UX Designer roles within your organization. With over 4 years of experience designing responsive web and mobile applications across fintech, cybersecurity, retail, and enterprise domains, I bring strong expertise in user-centered design, usability, and scalable design systems.

In my current role at Tevel Cyber Corps Pvt Ltd, I design UI for cybersecurity products and enterprise tools, focusing on improving user flows and overall usability. I conduct user research, interviews, and usability testing to identify key pain points and translate insights into effective design solutions. I have also built and maintained design systems that improved consistency across multiple product lines while collaborating closely with developers and security analysts to streamline workflows.

Previously, at MPura Inc, I led UI/UX design for fintech applications serving US-based clients. I delivered dashboards, user portals, and mobile applications across multiple platforms, while executing end-to-end design processes for enterprise applications. My work involved usability testing and continuous refinement based on user feedback to enhance engagement and performance.

Additionally, my freelance experience includes designing responsive web and mobile solutions for a GCC-based retail client, where I developed UX strategies, user flows, and wireframes to support a large product catalog.

I am proficient in tools such as Figma, Adobe XD, Sketch, InVision, and other design platforms, and bring strong skills in user research, wireframing, prototyping, accessibility, and information architecture. My background also includes content writing, which strengthens my ability to communicate design ideas effectively and create user-friendly content.

I am confident that my combination of technical expertise, creativity, and collaborative approach will allow me to contribute effectively to your design team.

I would welcome the opportunity to discuss how my UI/UX experience can support your organization's goals.

Thank you for your time and consideration.

Sincerely,  
Jayavel Ganesan
