Dear Hiring Manager,

I am writing to express my interest in the Facility / Building Services Engineer position in your company. With over six years of experience managing residential and commercial properties, I bring a strong record of preventive maintenance, vendor coordination, and compliance-driven operations that align well with Germany's standards for technical facility management.

In my current role at J-Power Technology Services, I respond to critical service calls for DG sets and electrical panels, ensuring uptime through quick restoration, vendor alignment, and precise documentation. Previously at Vergyl Enterprises, I oversaw lift, fire, and electrical systems in high-rise facilities, introducing preventive maintenance calendars and SOPs that reduced audit nonconformities and improved SLA adherence. My early foundation as a facility technician at Updater Services built my hands-on understanding of life-safety systems and shift operations.

I am certified in DGUV V3 electrical testing, Elektrofachkraft per DIN VDE 0105-100, and TUV / SimaPro FM, reflecting my commitment to German safety and FM standards. I am also developing my German language skills (A1) to integrate smoothly into on-site teams.

I would welcome the opportunity to contribute to operations and ensure the reliability, safety, and efficiency of your facilities. Thank you for considering my application. I look forward to the possibility of an interview.

Sincerely,
Saravanan M
