Professional summary

Senior QA and Test Engineer with 10 years of expertise in functional, integration, regression, and user acceptance testing across Insurance, Healthcare, E-commerce, and Digital Marketing domains. Demonstrated success in leading SIT/UAT cycles, managing defects, and coordinating cross-functional teams for large-scale enterprise applications. Proficient in API testing, SQL/NoSQL databases, cloud platforms (AWS, Cloudera), and Big Data tools (Hive, Spark). Track record of delivering end-to-end test planning, execution, and automation that ensures high-quality deliverables and reduces post-production defects. Collaborative in working with global teams to achieve project delivery within defined scope, timelines, and quality standards.

Skills

Testing & QA Tools: SoapUI, Postman API, Jira, ALM, TFS, Polarion	Databases & ETL: MS SQL Server, Oracle SQL Database, MySQL, MongoDB, CA Workload Automation, MS Integration Services
Cloud Platforms & Big Data: AWS (S3, EMR, Step Functions, CloudWatch), Cloudera, Splunk (log validation)	Programming & Scripting: SQL, Python (Basics)

Development Environments: Eclipse IDE, IntelliJ IDEA

Professional Experience

SIT Lead – FWD Group Holdings 05/2024 to Current
Capgemini Technologies Pvt Ltd – India

- FWD Group** – Multi-market insurer across 9 APAC regions, offering life, medical, general insurance, employee benefits, and Shariah/family takaful products.
- Lead SIT cycles for ~20+ sprint releases, from planning to UAT hand-off, covering Life, Health, and Investment products.
 - Manage offshore SIT team of 6–8 members; assign tasks, track execution, and deliver daily/weekly/monthly reports to stakeholders.
 - Validate backend data using SQL and AWS DynamoDB; prepare/modify datasets to match ~100% of test case scenarios.
 - Test core systems (Life J, OPUS, OWB) and investment features including fund switches, withdrawals, and beneficiary/rider updates.
 - Verify claims workflows, onboarding flows, deep links, and sign-up/login processes in OMNE apps, reducing UAT defect leakage by ~15%.
 - Log and track 100+ defects in JIRA per release cycle; coordinate fixes with developers and retest for closure.
 - Perform production defect validation and deployment checkouts to ensure 100% functional readiness before go-live.

ASM Lead – Allianz Life of North America 08/2023 to 04/2024
Capgemini Technologies Pvt Ltd – India

- Allianz Life Insurance Company of North America**, a leading U.S. provider of life insurance, annuities, and retirement solutions serving millions nationwide.
- Managed incident triage for 10+ Allianz NA applications, assigning to correct QA teams and tracking ~20–30 issues per release.
 - Delivered 100% on-time daily and weekly consolidated status reports to onshore/offshore stakeholders.
 - Coordinated with clients and managers on 5–10 critical production incidents per release, ensuring resolution within agreed SLAs.
 - Led 8–12 test design and results walkthroughs with business, development, and stakeholders for production deployment sign-off.
 - Partnered with developers during daily defect triage, expediting fixes and retesting to cut resolution time by ~15%.
 - Mentored 4+ new team members, delivered KT sessions, and ensured all mandatory training was completed.
 - Prepared test plans, allocated resources for each release, and cascaded updates to maintain 100% team alignment.

Senior Consultant – CareSource Clinical/UM 07/2022 to 06/2023
Capgemini Technologies Pvt Ltd – India

- CareSource** – One of the largest U.S. Medicaid managed care plans, delivering member-centric healthcare coverage through a holistic model that addresses both clinical and social determinants of health.
- Performed end-to-end UAT for ~15–20 features per release, ensuring 100% production readiness.
 - Created 50+ authorizations across multiple portals and loaded into Guiding Care for multi-stage testing.
 - Analyzed 100+ user stories, logged ~30–40 defects in ALM/TFS per release, and tracked to closure.
 - Validated Guiding Care workflows post-patch deployment across 5+ integrated systems (claims, provider, member portals).
 - Mapped architecture flows for each project, improving test accuracy and coverage by ~15%.
 - Maintained and ran regression automation scripts, updating test data for 100% scenario coverage.
 - Participated in 20+ refinement meetings, daily stand-ups, and SQA handover sessions to align with delivery timelines.

Senior Test Engineer 12/2018 to 07/2022
Wipro Technologies and Raas Info Solutions Pvt Ltd – India

BeaconLBS – Laboratory benefit solutions provider connecting health plans, physicians, and network labs through integrated technology that automates clinical and financial decision-making at the point of care and ordering, enabling high-quality, cost-effective patient care.

- Performed smoke and integration testing for 10–15 builds per release in lower environments.
- Designed regression suites covering 100+ scenarios after detailed requirement analysis.
- Executed end-to-end testing prior to all production releases, ensuring 100% functional readiness.
- Participated in 20+ UAT demos, reviews, and defect triage meetings per release cycle.
- Ran 50+ automation scripts in Eclipse and IntelliJ; maintained execution logs and daily trackers for stakeholders.
- Provided KT to 5+ new team members to accelerate onboarding.
- Validated 200+ application log entries in Splunk and AWS CloudWatch for error tracking.
- Verified 837 EDI files across multiple segments, database loads, and ETL job results.
- Configured 10+ ETL jobs, scheduled notifications, and validated request/acknowledgement/error files.

Senior Process Associate – Google Ads
Cognizant Technology Solutions – India

12/2017 to 12/2018

Google Ads – Leading global digital advertising platform enabling businesses to run targeted search, display, and video campaigns to drive customer engagement and conversions.

- Provided technical support to 50+ advertisers in live production, resolving campaign and platform issues.
- Performed SEO optimisations that improved ad visibility and click-through performance.
- Identified and logged 20+ defects per release based on requirement gaps and actual behaviour.
- Validated 100% of end-to-end campaign workflows and executed smoke tests before deployment.
- Delivered post-checkout support, resolving 95% of reported issues within SLA.
- Validated analytics data and identified multiple defects in Google Analytics tracking.

D2TS Associate
Amazon Development Center India – India

10/2016 to 11/2017

Amazon India – Wholly owned subsidiary of Amazon.com, offering e-commerce services across multiple categories including books, movies, and television shows.

- Provided production support for Alexa and Kindle software used by millions of customers.
- Validated actual vs. expected behaviour and logged 10+ defects per release cycle.
- Performed manual testing across 5+ application modules.
- Executed 50+ end-to-end, functional, and regression test cases in varied environments.
- Reported issues, participated in defect triage meetings, and tracked closures to completion.
- Joined weekly status review meetings, presenting testing progress to stakeholders.
- Reviewed 100% of business requirements to ensure complete test coverage.

Quality Analyst – Sony DI
Sykes Business Services India Pvt Ltd – India

03/2014 to 07/2015

Sony Digital Imaging (Sony DI) – Web application providing product selection, purchase, sign-up, and order tracking features with a menu-driven interface to enhance user experience.

- Performed manual testing on 5+ front-end web application modules.
- Conducted functional tests verifying 100% of UI elements including images, text, alignment, and borders.
- Executed security testing to ensure safe usage for all transactions.
- Performed payment testing, validating multiple transaction flows for seamless processing.
- Conducted compatibility testing across 5+ browsers/devices for consistent performance.
