Dear Hiring Manager,

I am writing to express my interest in the Senior QA/Test Engineer position with your esteemed organisation in Germany. With a Bachelor's degree in Electronics and Communications Engineering and 10 years of experience spanning Insurance, Healthcare, E-commerce, and Digital Marketing domains, I bring a proven ability to deliver high-quality software solutions that meet both functional and business requirements.

In my current role as SIT Lead at Capgemini for FWD Group Holdings, I manage offshore QA teams, lead end-to-end SIT/UAT cycles for multi-market insurance and lifestyle applications, and ensure defect leakage is reduced significantly before go-live. Previously, as ASM Lead for Allianz Life of North America, I coordinated incident triage across 10+ applications, streamlined defect resolution, and ensured production readiness under tight deadlines. My tenure with CareSource involved handling enterprise-level UAT, multi-system integration validations, and automation regression suites strengthening my capability to work across complex, large-scale systems.

Earlier in my career, I contributed to high-impact projects at Wipro (BeaconLBS - healthcare laboratory systems), Cognizant (Google Ads - global advertising platform), Amazon (D2TS - Alexa/Kindle support), and Sykes (Sony Digital Imaging - e-commerce platform). These roles honed my expertise in functional, integration, regression, and user acceptance testing, API testing, SQL/NoSQL database operations, cloud platforms (AWS, Cloudera), and Big Data tools (Hive, Spark). I have a track record of optimising workflows, ensuring 100% test coverage, and delivering defect-free releases within strict timelines.

My technical proficiency includes tools such as SoapUI, Postman API, Jira, ALM, TFS, Polarion, AWS (S3, EMR, Step Functions, CloudWatch), Cloudera, Splunk, Eclipse IDE, IntelliJ IDEA, and scripting with SQL and Python (Basics). Coupled with certifications in Global Insurance (L1), Fundamentals of Insurance - 1, Hive for Processing Big Data, and Introduction to Cloud Computing, I am well-prepared to contribute to quality assurance excellence in fast-paced, global environments.

I am eager to bring my expertise, leadership skills, and commitment to quality to your organisation in Germany. I welcome the opportunity to discuss how my background can align with your requirements and contribute to your success.

Thank you for considering my application. I look forward to the possibility of an interview.

Sincerely,
Pudota Karthik Prakash
