Dear Hiring Manager,

I am writing to express my keen interest in agribusiness leadership opportunities in Germany, leveraging over 13 years of experience in crop nutrition, biologicals, and sustainable agricultural solutions across India, Southeast Asia, and the Gulf. My background combines product strategy, market development, and international business expansion, making me well-suited to contribute to Germany's innovation-driven agricultural sector.

At SML Limited, I have led transformative growth initiatives in crop nutrition and biologicals. By expanding horticulture clusters nationwide, I achieved 119% sales growth for Techno Z and drove adoption across 30,000+ hectares, directly impacting farmer productivity. I also partnered with global leaders such as Jain Tissue Culture to introduce new technologies, improving yields and strengthening farmer trust. Through 400+ scientific trials and 6,000+ commercial demonstrations, I enhanced market penetration and brand credibility among 60,000+ farmers.

Previously, as Product Manager at Jivagro, I executed nationwide campaigns reaching 2 million farmers and successfully rebranded 53 products across 150+ SKUs streamlining go-to-market execution and dealer communications. My role in international business development at Krishi Rasayan Exports extended the company's footprint to 8+ countries, securing registrations and generating \$1M+ annual revenue, reflecting my ability to drive sustainable global expansion.

My early experiences at DuPont and Dhanuka Agritech equipped me with hands-on expertise in channel development, farmer outreach, and trade marketing. Additionally, my entrepreneurial journey as founder of Devarsh Nutrivet demonstrates my capacity to build and scale agribusiness ventures from concept to operations, reaching 2,000+ farmers within two years.

With a Post Graduate Diploma in Agri-Business Management and a Bachelor of Science in Agriculture, I bring both academic grounding and field-tested expertise. My core strengths include product portfolio management, international partnerships, R&D alignment, and sustainability initiatives such as LCA, CBAM, and GHG reduction projects areas that align with the evolving priorities of the German agricultural market.

I am particularly drawn to Germany's leadership in sustainable farming, agri-innovation, and climate-smart solutions. I am confident that my record of driving measurable growth, expanding global markets, and leading cross-functional teams positions me to add value to your organization's mission and growth in Europe.

I would welcome the opportunity to discuss how my expertise can contribute to advancing your agribusiness objectives in Germany. Thank you for considering my application.

Sincerely,
Siddhesh Ubhare
