Dear Hiring Manager,

With 3+ years in HCC/risk adjustment coding and quality assurance at Optum, I bring strong payer-provider exposure, audit-ready accuracy, and a disciplined approach to clinical abstraction. Skilled in translating complex physician documentation into ICD-10 codes with clear rationale, I consistently align outputs to HIPAA and CMS standards while maintaining speed and precision in high-volume environments.

In my current role as Medical Coder, I manage multi-payer risk-adjustment queues, applying ICD-10 and HCC guidelines alongside project-specific edits. Daily work includes reviewing 120-150 charts, documenting defensible code selections, and closing CDI queries promptly to ensure traceability. This routine has helped sustain 95%+ accuracy and stable throughput while reducing downstream rework through early clarification.

Prior roles as Junior and Trainee Medical Coder strengthened my foundations in encoder/EHR navigation, checklist standardization, and QA-led learning cycles. Contributions to shared FAQs and SOP updates reduced clarification loops and improved first-pass yield across teams. Collaboration with clinicians and QA reviewers has been central to resolving discrepancies and upgrading documentation quality at the source.

Germany's shift toward ICD-10-GM/OPS and DRG-based environments matches my next growth step. I am ready to transfer my risk-adjustment and QA rigor to German coding standards, support compliant reimbursement pathways, and keep coding decisions clinically and audit defensible. I look forward to contributing to your team's quality targets, documentation excellence, and efficient patient-care billing workflows.

Sincerely,

Avula Divya
