Dear Hiring Manager,

I am writing to express my interest in opportunities in Germany as a Senior GIS Analyst. With over seven years of experience in geospatial analysis, remote sensing, and spatial data management, I have delivered projects across land administration, infrastructure planning, forest conservation, and geological surveys in both government and international consulting environments.

At the Directorate of Land Records & Surveys, Government of Assam, I modernized cadastral workflows by automating processes for more than 50,000 land parcels, directing surveys across 2,500 sq. km, and consolidating a geodatabase of over five million records. These initiatives reduced manual work by 75% and improved data accuracy. I also trained more than 200 staff members, ensuring adoption of standardized GIS practices. Previously at SBL Knowledge Services, I achieved 94% accuracy in deforestation detection using Python classifiers and digitized over 5,000 geological datasets for subsurface modeling. At WSP, I supported high-profile projects including High-Speed Rail and Heathrow Airport, creating ArcPy automation tools that cut manual workloads by 60% while ensuring precise survey coordination across India–UK teams.

I hold a Post Graduate Diploma in Remote Sensing & GIS from Jamia Millia Islamia, a Master's in Geography from Bangalore University, and a Bachelor's in Geography from Miranda House, Delhi University. My skills include ArcGIS Pro, QGIS, ERDAS Imagine, ENVI, Google Earth Engine, Python (ArcPy, GeoPandas, Rasterio, Shapely, PyProj, OpenCV), SQL, R, and GPS/GNSS survey equipment.

I am eager to bring my expertise in automation, geospatial intelligence, and cross-functional collaboration to organizations in Germany. I am confident my background will add measurable value to projects requiring high-precision spatial analysis and scalable GIS solutions.

Thank you for considering my application. I look forward to the opportunity to discuss how my experience can support your team's success.

Sincerely,
Tamanna Shahin
