Dear Hiring Manager,

I am writing to express my interest in industrial engineering and manufacturing leadership opportunities where I can apply my extensive background in industrialization, process optimization, and engineering project management. With over 16 years of diverse experience across leading multinational organizations, I have successfully led high-impact industrial projects across India, Saudi Arabia, and Poland, with global exposure in Canada and South Korea.

Currently, I serve as a Site Industrial & Process Engineering Manager, directing engineering operations across four global manufacturing locations. I have successfully led greenfield and brownfield projects, reduced capital expenditure through design innovation, and improved production cycle times using MTM1 and Lean methodologies. My expertise spans layout planning, VSM, industrial costing, customer management, and the deployment of MES systems such as SAP, Oracle, and Delmia.

Throughout my career at companies like Alstom, Bosch, Michelin, and Foxconn, I have led the commissioning of automated lines, implemented cost-saving automation systems, and optimized processes using Six Sigma and MTM/UAS. My leadership in process engineering has consistently delivered measurable improvements in capacity, cost reduction, and time efficiency.

I have been recognized for driving automation through collaborative robots, AGVs, and vision systems, as well as standardizing process documentation, PFMEA, SOPs, and time studies. My ability to coordinate large cross-functional teams and execute infrastructure projects ranging from plant setup to equipment transfer and line relocation demonstrates a strong command of industrial project execution and continuous improvement practices.

I am excited about the opportunity to contribute my technical and managerial expertise to a globally oriented organization committed to operational excellence and innovation. Thank you for considering my application.

Sincerely,

Ezhilarasan V
