

EZHILARASAN V

Tamil Nadu, India - 600123 | +91 9791004142 | ezhil.maxis@gmail.com | [LinkedIn](#)

Professional Summary

Industrial Engineering leader with 16+ years of experience across multinational companies including Raychem RPG, Alstom, Bosch, Michelin, and Foxconn. Proven track record in **greenfield/brownfield industrialization, layout and process design, cost optimization, and automation deployment**. Led cross-functional teams across **India, Saudi Arabia, and Poland**, with global exposure in Canada and South Korea. Adept in VSM, MTM1/UAS, Lean, Six Sigma, and MES systems including SAP, Oracle, and Delima.

Skills

- | | |
|--------------------------|---------------------------------|
| • Industrialization | • VSM |
| • Lean and Six Sigma | • Project Management |
| • Industrial Costing | • Facilities & Infra |
| • Industrial Times | • Layout Planning |
| • Continuous Improvement | • Customer & Quality Management |

Work History

Raychem RPG – Mumbai, India

01/2025 to Current

Site Industrial & Process Engineering Manager

- Directed industrial & process engineering operations across 4 global sites with a team of 16 engineers.
- Leading industrialization of automated manufacturing lines (Injection molding, electrical insulated gloves, gas meters Assy, Junction box, solar connectors, Coe machine shop).
- Ensuring Capex, Co-engineering, Development, PPAP & Industrialization, Change management, ERP management & timely readiness for new project & products with RTF approach.
- Resp for site & project capex across 4 sites and taking care of plant expansion, layout, sizing & Infra activities.
- Audits TE, Customer WMS audit, IATF 16949, ISO 9001, ISO 14001, ISO 45001

Key Achievements – Raychem RPG

- Set up Process Engineering functions at Vasai, Naigaon, Saudi and Poland sites.
- Established outsourcing of NVA activities in Gas meters, junction boxes and connectors.
- Implemented AI-RPA for automating Cycle time master library, Task sequence, Bom extraction and GRN.
- Initiated WMS for RM & FG stores, digitalizing with traceability. Reduced stores manpower from 28 to 16.
- Reduced powder coating manpower by from 37 to 26 through Lean principles using VSM.
- Cut new glove 2nd line project capex from ₹18 Cr to ₹12 Cr via process redesigning & optimization.
- Achieved 25% CT reduction in Gasometer, Junction Box & Connector lines using MTM1 & Timer pro analysis.
- Launched SharePoint, dashboards, Microsoft Forms/Power BI tools across 4 sites for approval and KPI tracking.
- Reduced PCN lead time from 5 to 2 days; CT and routing hour calculation from 12 to 4 days.
- Shortened new project RFQ turnaround from 21 to 14 days.
- Established SharePoint dashboards and Microsoft Power BI tools to digitalize PE functions.

Alstom Transport – India

08/2019 to 01/2025

Fitting Methods Lead

- Led fitting industrialization for Smart Metro projects (Sydney, Montreal, Chennai, Pune, Kochi).
- Commissioned new 13,612 sqm automated assembly shop for smart metro fitting shop.
- Directed RFQ processes and costing for tenders, managing deliverables (V-cycle gate reviews, wki, pfmea, task sequences, macro processes, pfc, mbom, routings, cycle/method times, work packages).
- Managed site and project capex/opex; conducted FMR, SMR, GSR, RFC, and CR process.
- Drove continuous improvement via VSM, Lean eliminating the NVAs.
- Recognized as WCM Expert for Fitting & Assembly (APAC).
- Audit: Internal APSYS, ISO TS 22163.

Key Achievements:

- Led construction and industrialization of new Smart Metro Assembly Shop (13,612 sqm).

- Implemented automation in assembly shop, reducing method time from 1350 to 950 hours.
- Deployed automated conveyor systems, articulated welding robots, and AGVs for sub-assembly transport.
- Introduced robotic welding setups (F1 station) and manipulators for HVAC, doors, windows, and gangways.
- Digitalized torque tools with shadow boards; implemented MTM1 & UAS for method time analysis with standard data cards.

Bosch Limited – India

03/2014 to 03/2019

Senior Engineer Technical Functions

- Managed green field industrialization, relocation and commissioning of 5 manufacturing lines within 10 months.
- Products Handled: electronic throttle bodies, Pressure sensor, Temperature sensor, crank speed sensor, Fuel supply module and accelerator pedal module.
- Performing cost calculation for new RFQ, Design review, Layout planning, sizing, ordering of new machines, tools, performing Mbom, CT, MT, Task sequence, routings in SAP, PPAP documentation & customer approval.
- Responsible for BPS & Customer audit, IATF 16949, ISO 9001, ISO 14001, ISO 45001.
- Deployed low-cost automation using UR Robot, pick-and-placers, and vision systems (Keyence, Omron).
- Conducted MTM studies reduced NVAs & NNVA's using VSM approach. Reduced MT, Takt time, CT studies to boost capacity for future demand.

Key Achievements:

- Implemented low-cost automation project in pressure sensor line using pick-and-place systems, Pallet conveyors and collaborative robots.
- Upgraded manual coil winding, soldering, resistance welding and glue dispensing into automated once.
- Deployed IFM, Keyence & Omron vision systems for poke yoke & process verification.
- Integrated Miyachi weld checkers to find and eliminate weld defects successfully.
- Relocated 5 assembly lines from Bangalore to Tirunelveli within 10 months.
- Industrialized electronic throttle body facility for BS6 in India. Relocated lines from South Korea to India.
- Upgraded pressure sensor line to full automation, increasing capacity from 65K to 120K units/month.
- Upgraded accelerator pedal module line to full automation, boosting output from 35K to 58K units/month.

Operations Engineer Curing shop

10/2011 to 03/2014

Michelin India Tamil Nadu Tyres Pvt Ltd – India

- Responsible for green field industrialization and SOP for fully automated CEV based curing shop.
- Layout designing, planning and ordering of machine, tools for curing shop.
- Relocated automated fully automated CEV presses from Canada after successful TOT.
- Created WKI, PFMEA, SOP, HIRA, CT, MT, studies using MTM1 and Timer Pro.
- Implemented cost-saving initiatives and conducted root cause analyses for 0 Km defects.

Key Achievements

- Led infrastructure project for new 22,500 sqm greenfield plant in Gummudipoondi, Chennai.
- Completed technology transfer in Canada and relocated 5 fully automatic CEV curing presses.
- Delivered fully automated curing shop within 18 months.
- Industrialized automated material transfer unit.
- Managed procurement and commissioning of automated curing presses, transfer unit and mezzanine storage.

Classic Auto Tube Limited – India

05/2011 to 09/2011

Executive Tire Building

Foxconn India Pvt Ltd – India

04/2010 to 05/2011

Junior Engineer

Education

Master of Technology: Manufacturing Management	01/2025
Bits Pilani – Rajasthan, India	
Bachelors of Technology: Mechanical Engineering	01/2013
Dr. MGR University – Tiruvallur, India	
Diploma: Mechanical Machine Tool Maintenance	01/2009
CPAT TVS – Tiruvallur, India	
Languages
