Dear Hiring Manager,

I'm applying for Performance Marketing / Paid Media roles in UAE, bringing 8+ years leading multi-channel growth for enterprise and global brands across retail, hospitality, and B2B tech. I build KPI-led media plans, run rigorous testing, and improve efficiency through tight optimization loops. I consistently exceed targets by 30% while keeping reporting, governance, and stakeholder alignment clean and reliable.

In my current role as Senior Media Planner, I own paid media strategy across paid social, display, and video. I optimize Meta, Google, Snapchat, and Pinterest using structured audience segmentation, creative testing, and budget reallocation based on performance signals. I improved ROI and cost per result by 20-30% through bid tuning, incrementality-focused experiments, and weekly performance reviews that stay action-driven. I also maintain risk controls through pacing, QA checks, and clear escalation paths when performance drifts.

Previously at dentsu, I led cross-regional programs for brands including Hollister, BOSCH, Hilton, and MGM+ across US, EMEA, and APAC. I managed integrated planning across paid social, search, and programmatic, and guided a team of up to eight marketers. I increased CTR by 25% and lifted ROI by 30% by tightening measurement, running structured A/B tests, and improving campaign hygiene from naming conventions to audience exclusions. I delivered QBR-ready insights with clear next steps, aligning marketing goals with forecasted outcomes and budget governance.

UAE-based teams value structured execution, measurable impact, and stakeholder trust. I bring hands-on platform depth (GA4, Looker Studio, SEMrush, Meta Ads Manager, Amazon DSP), strong performance analysis, and disciplined optimization for scalable growth. I would welcome the chance to discuss how I can help you improve ROAS, lower CPA, and strengthen end-to-end measurement across your acquisition programs.

Sincerely,
Raghu D
