Summary

Engineering Manager with 12+ years leading Android-first mobile programs for enterprise and consumer products across EU/USA/APAC. Builds cross-functional squads (Android, iOS, backend, QA) that deliver to roadmap, quality bars, and predictable releases. Establishes CI/CD, automation, and observability to compress cycle times and reduce escape defects at scale. Partners with product and client sponsors to align scope with OKRs and measurable outcomes. Deep Android (Kotlin, Jetpack, MVVM/MVI); working iOS (Swift) and backend (Python, REST) for platform alignment.

Core Skills

- | | | |
|--|--|--|
| • Leadership: roadmap ownership, stakeholder mgmt, hiring & mentoring, performance mgmt, vendor coordination | • Tooling: CI/CD (GitHub Actions, Jenkins), Fastlane, Gradle, Bitrise, Firebase/Crashlytics, Play Console | • Backend (working): Python (FastAPI), REST, microservices basics, cloud-native concepts |
| • Mobile: Android (Kotlin, Jetpack, MVVM/MVI), iOS (Swift), security, feature flags, analytics, A/B, crash mgmt | • Quality: Agile/Scrum, release mgmt, code reviews, observability (logs/metrics), SLOs, test automation | • Domains: B2B/B2C mobile, ecommerce, enterprise apps; international delivery (Germany/EU/USA/APAC) |

Experience

HashedIn by Deloitte

October 2017 – Present

Senior Engineering Manager

Bengaluru, India

- Directed mobile delivery across multi-client programs; aligned OKRs and release plans to value targets for EU/USA/APAC.
- Automated CI/CD with Fastlane & GitHub Actions; accelerated cycle time by 40% and lifted on-time releases.
- Scaled regression & smoke automation; boosted QA throughput by 60% and reduced escape defects materially.
- Standardized code reviews & observability; sustained 99.9% crash-free sessions across flagship Android deployments.

Techniche Ecommerce Solutions

June 2016 – October 2017

Technical Lead

Bengaluru, India

- Led Android architecture for ecommerce apps; defined milestones and risk controls for 100K-user scale.
- Established CI, instrumentation & review gates; reduced rollbacks and improved sprint predictability measurably.
- Mentored junior engineers via design reviews & pairing; raised delivery quality and team velocity quarter over quarter.
- Shipped checkout, payments & catalog features; upheld ratings and stable funnel performance post-release.

Negocios IT Solutions

November 2011 – May 2016

Software Engineer → Senior Software Engineer

Trivandrum, India

- Engineered native Android apps end-to-end; owned UX flows, networking, persistence, and Play Store releases.
- Integrated REST APIs & SDKs (payments, chat, maps); enforced secure auth, caching, and robust offline paths.
- Extended backend modules in Python/C#; unblocked mobile features and improved data fidelity across services.
- Partnered with PM & QA on acceptance criteria; cut rework and stabilized regression cycles across clients.

Key Achievements

- Engineered a cloud-native revamp of a legacy Android app; modularized with Kotlin and Jetpack to improve performance by 50% and speed feature delivery.
- Built a unified CI/CD strategy for Android and iOS using Fastlane and GitHub Actions; reduced platform drift and rollbacks while accelerating release cadence.
- Delivered multiple production apps with 99.9% crash-free users and 4.5 Play Store ratings by hardening reliability with Crashlytics, ANR fixes, and test automation.

Education

University of Kerala	September 2011
Master of Computer Applications (MCA)	Kerala, India
University of Kerala	July 2008
Bachelor of Computer Applications (BCA)	Kerala, India
