Dear Hiring Manager,

With 11 years in IT services and 7 years focused on SAP Ariba, my work centres on Source to Contract and Procure to Pay across energy, mining, utilities, airline and consumer clients. In my current role at Accenture, I lead SLP, S2C and P2P workstreams and align Ariba solutions with SAP ECC and SAP S4, working closely with SAP MM and integration teams. The goal is always the same: stable processes, fewer incidents and faster cycles for business users.

Typical responsibilities include designing and configuring sourcing and contract templates, approval flows and supplier lifecycle steps, as well as managing change and incident backlogs to agreed SLAs. I support workshops and UAT with global stakeholders and cooperate with middleware teams using SAP Integration Suite or SAP PI or PO, XML and IDoc to keep P2O and P2P interfaces reliable. Earlier experience at TCG Digital on SAP Ariba P2O for United Airlines built a strong base in production support and interface troubleshooting.

Your organisation can expect a consultant who understands both functional Ariba design and integration, who communicates clearly with business and IT and who treats service quality and documentation as part of daily work. English is at full professional level and German is under active improvement, with a clear plan to work long term in Germany.

Thank you for considering my application. I would welcome the opportunity to discuss how my SAP Ariba experience can support your procurement and integration roadmap.

Sincerely,
Kareem Basha Shaik
