Experience

Accenture

June 2018 to Present

SAP Ariba Consultant

Hyderabad, India

- Leads SAP Ariba SLP, S2C and P2P workstreams for energy, mining, utilities and consumer clients and owns change and support.
- Configures sourcing templates, contracts, approvals and supplier lifecycle flows and aligns Ariba design with process owners.
- Delivers around 20% faster requisition and sourcing cycles and cuts interface errors by around 40% across releases.
- Manages change and incident tickets with around 95% on time resolution and reduces repeated user issues by around 25%.

TCG Digital Solutions Pvt Ltd

September 2016 to April 2018

SAP Ariba Consultant

Hyderabad, India

- Delivered SAP Ariba P2O application support and minor enhancements for United Airlines and airline procurement stakeholders.
- Handled configuration changes, defect fixes and interface troubleshooting with technical teams using XML, IDoc and SAP PI or PO.
- Improved first time acceptance of change requests to around 90% and reduced recurring interface incidents by around 35%.
- Documented process flows and work instructions and cut onboarding time for new team members by around 30%.

Projects

SAP Ariba SLP rollout for global energy company — Hyderabad, India **November 2022 - Ongoing**

- Supported supplier lifecycle and performance rollout on SAP Ariba SLP for a global energy client as part of an enterprise programme.
- Set up entities, groups and user access and assisted with data imports and exports between Ariba SLP and SAP S4 systems.
- Enabled faster supplier onboarding and improved data consistency between Ariba and S4 and reduced manual rework for business teams.

SAP Ariba P2O integration for beverages company — Hyderabad, India **August 2018 - April 2019**

- Contributed to cloud-based SAP Ariba P2O integration for a beverages client covering service procurement scenarios.
- Worked with SAP MM and integration teams to configure endpoints and message mappings and validate P2O transactional flows.
- Supported reduction of manual purchase order processing effort by around 60% and stabilised P2O flows for end users.
