

Neethu Vinod

Senior Full-Stack Developer

✉ neethuav1906@gmail.com ☎ +91 96299 71498 📍 Berlin, Germany

🌐 <https://www.linkedin.com/in/neethu-vinod-ob8a35151/>

SUMMARY

Full-Stack Developer with 7+ years of experience building scalable web applications using React, Angular, Node.js, and SQL. Experienced in micro frontend architecture and cloud-native development with Docker and Kubernetes. Focused on performance optimization, secure coding, and clean, maintainable software in Agile environments.

Currently holding German **Chancenkarte** and actively seeking opportunities in Germany.

EXPERIENCE

Software Application Development Engineer

Intel

09/2024 – Present
Bengaluru, India

- Delivered end-to-end full-stack solutions (React, Node.js) for an analytics platform used by 200+ cross-functional users
- Implemented RBAC-based authentication, reducing unauthorized access by 30% and strengthening security compliance
- Built high-performance UI components (AG Grid, virtualization), enabling seamless processing of 100K+ records and reducing load time by 25%
- Designed and performance-tested concurrent file upload functionality, improving system responsiveness by 35% under high load
- Developed automated unit and integration tests for 40+ screens, increasing test coverage to 85% and reducing regression defects by 40%
- Optimized Snowflake SQL queries and backend data integrations, improving analytics processing speed by 30%
- Containerized services using Docker and deployed to Kubernetes (GaaS), reducing deployment time by 30% and improving release stability

Application Developer

Neudesic Technologies - An IBM Company

02/2019 – 08/2024
Bengaluru, India

- Led frontend development of an enterprise-scale Auctions Management System (Angular, Node.js) supporting multiple auction platforms and 5,000+ active users
- Designed and implemented a scalable micro-frontend architecture; developed and published 20+ reusable microapps adopted across multiple auction websites, reducing feature duplication by 35%
- Built and governed a centralized design system using Stencil and Storybook, standardizing UI/UX across teams and accelerating feature delivery by 30%
- Mentored and coached 10+ developers; conducted structured code reviews and introduced architectural best practices, reducing production defects by 25%
- Implemented performance optimizations (lazy loading, code splitting) and WCAG accessibility standards, improving page load speed by 30% and increasing accessibility compliance to 95%
- Established unit testing framework using Karma and Jasmine, increasing test coverage to 80%+ and reducing regression issues by 40%
- Migrated 20+ microapps and 50+ Angular modules to newer versions while maintaining backward compatibility, ensuring zero critical production downtime during releases
- Ensured cross-browser compatibility and responsive design across platforms, reducing UI-related support tickets by 30%

EDUCATION

Bachelor of Engineering in Computer Science Engineering
Sri Ramakrishna Engineering College

01/2014 – 01/2018
Coimbatore, India

CORE SKILLS

- Frontend Development**
React , Angular, TypeScript, Material, JavaScript (ES6+), HTML5, CSS3, TailwindCSS, State Management (Redux, Context API, NgRx), Responsive Design, Accessibility (WCAG), Chart.js, Frontend Performance Optimization
- Backend Development**
Node.js, .NET, C#, Java, REST API Development, Authentication & Authorization (OAuth2, JWT, RBAC), API Security, Error Handling & Logging, Microservices Architecture
- Databases & Data**
SQL, Snowflake, Query Optimization, Stored Procedures, Large Dataset Processing
- Cloud & DevOps**
Docker, Kubernetes, CI/CD Pipelines, Azure / AWS / GCP, Monitoring & Logging
- Architecture & Design**
Microfrontends, Microservices, Modular Architecture, Domain-Driven Design (DDD), Clean Architecture, Design Patterns, Scalable System Design
- Quality & Delivery**
Automated testing, Unit Testing, Integration Testing, Test Coverage, Code Reviews, Agile / Scrum, Production Support
- AI & GenAI Skills**
AI-powered UI (React),LLM Integration (OpenAI APIs),Prompt Engineering & Context Design,AI Microservices (Docker + Kubernetes)
- Data Structures & Algorithms**
Arrays, HashMaps, Recursion, Stack, Queue,Time Complexity Analysis
