Summary

Full-stack JavaScript developer with 3 years of experience. Delivered responsive web experiences for advertising and subscription services, increasing user interaction and retention through iterative UX improvements. Built user-centric interfaces and navigation flows. Developed an end-to-end payroll management system with compliant workflows, accelerating processing and resolving issues before launch.

Core Skills

- | | | |
|---|---|---|
| • Frontend: React, Next.js, TypeScript, HTML5, CSS3, Tailwind CSS, MUI, SASS | • State & Data: Redux, Zustand, TanStack Query (React Query) | performance tuning |
| • Backend: Node.js, REST APIs, MongoDB, Strapi CMS, Supabase, | • Platform: SSR, SSG, routing, authentication, authorization, | • Dev Practices: Git, code review, PR workflows, Agile, CI readiness |
| | | • Domains: Adtech, Telecom, Subscription journeys |

Experience

Mozaic Technologies

May 2024 – Present

Software Developer II

Remote

- Delivered subscription and advertising web experiences for marketing and design partners using Next.js and TypeScript.
- Engineered React pages, secure auth and REST integrations; abstracted UI into reusable components and utilities.
- Improved Lighthouse toward 90+, lifted CTR and retention by 12-18%, and cut render overhead by about 20%.
- Shipped frequent releases via Git workflows, enabling reliable tracking and attribution for multi-channel campaigns.

Propelius Technologies

August 2022 – May 2024

Software Developer I

Surat, India

- Owned full-stack delivery across React/Next.js frontends and Node.js & MongoDB services for client projects.
- Implemented Redux and Zustand; integrated Strapi, Supabase and Appwrite to accelerate content and authentication.
- Cut initial load by about 30% and bundle size by 25% via code splitting and asset optimization.
- Lowered bug reopen rate by about 25% and reduced time-to-feature by about 20% across 4 shipped projects.

Collabera Technologies

March 2022 – May 2022

Software Engineering Intern

Vadodara, India

- Supported a payroll management system aimed at compliant workflows and accurate processing.
- Authored controller methods and services to extend capabilities and improve throughput under load.
- Collaborated on testing to resolve defects pre-release, stabilizing performance for end users.

Projects

BingeBucket

- Built a full-stack content discovery app enabling responsive search, browsing and authentication.
- Implemented Next.js, TypeScript, Zustand, NextUI, Tailwind CSS, React Query and Zod for data integrity.
- Improved navigation responsiveness and data fetch reliability, supporting multi-page flows at scale.
- Enabled faster iteration for content teams via clear component structure and typed contracts.

Infogram

- Delivered a data-driven content app with secure authentication and consistent routing behavior.
- Used React Router, TanStack Query and Appwrite with Tailwind CSS and Shaden/UI for modular UI.
- Reduced re-renders and page-to-page latency through cache policies and predictable state.
- Stabilized fetch flows and error handling, supporting reliable experiences across journeys.

Education

Parul University

May 2021

B.Tech in Computer Science Engineering

Vadodara, India
