Dear Hiring Manager,

I am applying for commercial/business development roles in European rail and transit where disciplined tendering, partner ecosystem growth, and localization/ToT are critical to profitable wins. With 13+ years across signalling, rolling stock, and fleet-lifecycle services, I bring a track record of building qualified pipelines, converting complex public tenders, and governing CRM-led pursuits across India, MEA, UK, and APAC ready to translate this rigor to DACH/EU procurement practices.

At TVM Signalling & Transport Systems, I currently lead multi-region business development and CRM governance. In my first six months, I mapped demand, enforced go/no-go and pursuit plans, and built a \$30-40M qualified pipeline, opening six new accounts and reactivating eight leads. I standardized on-time submissions to 100% and rolled out approval/audit workflows as CRM super-admin creating end-to-end traceability from lead to BAFO.

Previously at Wabtec (Faiveley), I owned intake, pricing, and risk reviews for passenger transit. In 2024, I delivered \$240M intake vs a \$180M target, secured 85% market share with Indian Railways in pantographs, and enabled a \$12M coupler award through ToT and vendor roadmaps at controlled risk. Earlier at Alstom, as APAC Commodity Lead for brakes & HVAC, I supported wins on Mumbai L3, Sydney Metro, REM (Canada) and more, while delivering €5.7M OE and €6.2M aftermarket savings via localization/value engineering. I also cut bid configuration cycles as product owner for a SMART subsystem configurator and saved €1.8M through localized test benches. My foundation at Faurecia spans PPAP/APQP, should-costing, and NPI-to-SOP supplier launches across global OEM programs grounding my commercial decisions in QCD and manufacturability.

I combine market-entry and key-account practice with compliant tendering (RFP/RFQ, compliance matrices, pricing, risk registers, contract terms) and vendor development for localization. Tooling includes SAP/M3, Power BI, and CRM workflows, domain exposure spans, doors, brakes, HVAC, couplers, pantographs, signalling, and fleet services. I completed the Executive Programme at IIM Bangalore and hold B1 German, I am comfortable operating with EU-ready terminology, governance, and audit trails. I would welcome the opportunity to help your team grow a qualified pipeline, raise win probability, and de-risk awards through transparent governance and value engineering.

Thank you for your time and consideration. I look forward to the possibility of discussing how my experience can support your growth in the DACH/EU rail market.

Sincerely,
Suryaraj R
