Subject: Application for Lead Data Analyst / BI Specialist Role – Germany

Dear Hiring Manager,

I am writing to express my interest in a Lead Data Analytics or Business Intelligence role in Germany. With over 16 years of experience in Banking, Financial Services, and IT, I bring a strong record of driving data-led decision-making, regulatory compliance, and process optimization across global markets including EU, USA, and APAC.

In my current role as Lead Analytic Consultant at Wells Fargo, I lead end-to-end remediation analytics, ensuring data integrity and compliance under EU-ready controls. I build SAS/SQL pipelines and Power BI/Tableau dashboards that enhance financial accuracy and reporting efficiency. By implementing standardized quality checks and root-cause diagnostics, I have improved policy adherence and reduced operational risk across multiple portfolios.

During my 14-year tenure at Wipro, I managed analytics programs for major BFSI clients, from data ingestion to executive reporting. I developed automated SAS macro libraries that cut manual effort by 40% and led cross-functional teams in delivering DB2-based solutions for operations and compliance. My expertise in data governance, ETL oversight, and stakeholder management has enabled me to translate complex analytics into actionable business outcomes.

I hold a Bachelor's degree in Electronics and Communication Engineering and am currently pursuing a Master's in Business and Law from OP Jindal Global Business School (2025), strengthening my understanding of the intersection between technology, business, and regulation. I am also a Certified Advanced SAS Programmer, Certified Scrum Master, and Power BI Specialist.

With my strong analytical foundation, multilingual communication skills (English – C1, German – B1), and proven ability to deliver audit-compliant, data-driven strategies, I am confident in my ability to contribute meaningfully to a dynamic, innovation-focused organization in Germany.

I would welcome the opportunity to discuss how my background can support your data and analytics initiatives.

Sincerely,

Philomena Elizabeth X
