Dear Hiring Manager,

I am writing to express my interest in Project Engineer / Planning Engineer opportunities within your organization. With over five years of experience across infrastructure and building projects—including airport cargo renovation, administrative facilities, and cold storage developments—I bring a strong combination of planning expertise, site execution knowledge, and quality-focused delivery.

Currently, I serve as a Project Engineer at Vermillion Enterprises Pvt Ltd, where I am involved in the strengthening and renovation of airport cargo infrastructure at Kempegowda International Airport, Bangalore. In this role, I coordinate civil, interior, and MEP activities to ensure alignment with project schedules and specifications. I also manage BOQ preparation, material take-offs, RFIs, and documentation, ensuring audit-ready records and smooth stakeholder communication.

Previously, with the Tamil Nadu State Agricultural Marketing Board, I held dual responsibilities in project execution and planning. I developed project schedules using Primavera P6, monitored progress through variance analysis and S-curves, and implemented recovery strategies to maintain timelines. My experience also includes 2D/3D modeling using Revit and AutoCAD, improving coordination between consultants and site teams and reducing rework. Across projects, I have consistently ensured compliance with quality standards while maintaining clear documentation and transparent reporting.

My academic background includes an MTech in Construction Engineering and Management with a CGPA of 9.59, complemented by certifications in Primavera P6, AutoCAD, and project planning. Additionally, my German language proficiency at B1 level supports my readiness to integrate into international project environments, particularly in Germany.

I am particularly motivated to contribute to projects that demand strong planning, coordination, and execution capabilities. I am confident that my technical expertise, attention to detail, and proactive approach to risk management will add value to your team.

I would welcome the opportunity to discuss how my experience aligns with your project requirements. Thank you for your time and consideration.

Sincerely,
Harish Durairaj
