Summary

Senior Android Engineer with 10+ years delivering Kotlin and Jetpack Compose apps across regulated domains. Designs MVVM and clean, modular code for testability, performance, and predictable releases. Builds CI/CD, analytics-by-design, and accessibility compliance for EU-ready products. Partners with design, backend, and QA to convert product goals into stable outcomes for global users.

Core Skills

- | | | |
|--|--|---|
| • Mobile: Kotlin; Java; Android SDK; Jetpack Compose; Navigation; Room; ViewModel; LiveData | • Quality: Unit/UI tests; instrumentation; static analysis; code review; performance profiling | • Collaboration: Agile/Scrum; JIRA; Confluence; Figma handoff; stakeholder communication |
| • Architecture: MVVM; Clean Architecture; modularization; dependency injection (~Hilt) | • DevOps: CI/CD (GitHub Actions); versioning; release automation; crash/analytics (~Firebase/GA4) | • Ecosystem: ReactJS; Node.js/Express; Docker (tooling); Git |

Experience

Eli Lilly Services India Pvt Ltd

October 2019 – Present

Senior Engineer, Software

Bengaluru, India

- Own Android feature delivery to meet accessibility, security, and compliance goals across healthcare apps.
- Engineer MVVM and Compose components; standardize patterns and CI gates with GitHub Actions pipelines.
- Optimize cold start and rendering via profiling; reduce jank and speed startup by ~25% for key flows.
- Create analytics framework for consistent events; cut ad-hoc code ~60% and improve insight quality.

Tata Consultancy Services

September 2015 – September 2019

System Engineer

Nagpur/Noida/Chennai, India

- Deliver Android features from spec to release for internal apps serving multi-site stakeholders.
- Collaborate with design, backend, and QA; enforce acceptance criteria and iterative delivery.
- Refactor hotspots and add tests; lower crash/ANR rates by ~30% across active modules.
- Lead VWM MVP with a 3-member team; hit timelines and enable adoption across user groups.

Projects

Lilly Together | Kotlin, Jetpack Compose, MVVM, CI/CD, Analytics

April 2022 – Present

- Ship secure enrollment and support flows for patients in regulated, multi-stakeholder environments.
- Compose navigation/state; integrate analytics-by-design; enforce tests and CI quality gates.
- Improve funnel observability; sustain predictable releases with lowered regressions over time.

Cerberus | Raspberry Pi, Python, Angular, Android

May 2021 – February 2022

- Replace scarce devices with a simulator to unblock testing cycles and cross-team demos.
- Build Pi-based emulation and services; validate parity for brand variants and workflows.
- Shrink test cycle time by ~40%; reduce hardware dependency and lab contention.

Lilly Analytics Framework | Android SDK, Event Schema, CI Integration

October 2020 – February 2021

- Standardize event tracking across apps to raise data quality and speed product decisions.
- Package shared SDK and schema; enable plug-and-play instrumentation with docs.
- Cut per-app analytics effort by ~60% and improve consistency portfolio-wide.

Education

Anand Engineering College

July 2010 – June 2014

Bachelor of Technology (B.Tech)

Agra, Uttar Pradesh, India

Languages

- English – Full Professional Proficiency (C1)
- German – Intermediate Working Proficiency (B1)
