Dear Hiring Manager,

I am applying for Workforce Management, Workforce Planning Analyst roles in Germany, focused on forecasting, capacity planning, and scheduling for contact-centre operations. I bring 9+ years across high-volume environments, combining interval forecasting, shrinkage control, and staffing optimisation with disciplined stakeholder cadence. In my current role at HSBC and previously at Accenture, I run end-to-end planning cycles that protect SLA, occupancy, and customer outcomes through accurate demand models and operationally usable schedules.

I build planning models that managers can act on. I own volume and AHT forecasts, convert demand into FTE requirements, and translate the plan into schedule patterns, breaks, and offline activities that preserve coverage. I use IEX and advanced Excel to run What-If scenarios for seasonality, events, and hiring constraints, and I present clear options on staffing levers, schedule changes, and shrinkage assumptions. I keep planning quality high through variance analysis, interval-level risk flags, and RCA packs that connect performance movement to drivers such as AHT shift, absenteeism, or mix changes.

I work closely with operations leaders to maintain stable service delivery while balancing cost and employee experience. I align hiring plans and capacity ramps with training throughput, shrinkage baselines, and productivity targets. I publish daily/weekly performance packs covering volume, AHT, SLA, occupancy, adherence, and absenteeism, and I drive a consistent Monthly Operating Review rhythm that results in decisions, not just reporting. I also strengthen schedule governance by improving offline planning windows, balancing coaching time with coverage, and tightening real-time adherence inputs to protect intraday performance.

Germany's contact-centre environments value reliable planning, clear reporting, and strong cross-functional execution. I bring practical WFM discipline that includes forecast-to-schedule traceability, scenario planning, and metric ownership while keeping communication direct and business-focused. I can support English-first teams immediately and operate in German at B1 level. I am ready to relocate to Germany and contribute from day one in a WFM, Forecasting, or Capacity Planning role.

Sincerely,
Ashok B N
