## Summary

---

Backend engineer with 5+ years designing and shipping Java services for enterprise products. Delivers clean REST APIs, resilient data access with Spring/JPA, and reliable releases through CI/CD and containers. Works closely with product, QA and SRE to stabilize services and reduce operational toil. Focused on roles in Germany that value dependable backend delivery and collaboration across agile squads.

## Core Skills

---

- **Backend** - Java, Spring Boot, Spring MVC, REST API design, JPA/Hibernate
- **PL/SQL, JDBC**
- **code reviews, SLAs**
- **Cloud/DevOps** - Docker, Kubernetes, Jenkins, Gradle, AWS, GCP
- **Practices** - Microservices, MVC, CI/CD, release management
- **Data** - Oracle, SQL Server, Cassandra,
- **Testing/Quality** - JUnit, Mockito,
- **Tools** - Splunk, Postman, GitHub, Jira

## Experience

---

### Tata Consultancy Services (TCS)

July 2020 – Present

*Software Engineer (Java Developer)*

*Chicago, IL*

- Improve service throughput for enterprise apps , built REST controllers and service layers in Spring Boot , lifted request handling by 15% (estimate).
- Reduce read latency on data-heavy endpoints , refactored ORM/JPA mappings to avoid N+1 queries , lowered average latency by 20% (estimate).
- Accelerate safe releases , containerized services (Docker) and deployed on managed Kubernetes (GKE) , cut rollback time and release friction.
- Shorten integration cycles , implemented Gradle builds and Jenkins pipelines with quality checks , reduced integration time by 40% (estimate).

### Cloud 9 Infosystems Inc

March 2020 – July 2020

*Cloud Data Engineer*

*Downers Grove, IL*

- Standardize analytics ingestion , built Azure data flows and validations , improved dataset trust for stakeholders.
- Enable faster reporting , delivered Power BI dashboards for finance , shortened turnaround by 30% (estimate).
- Speed onboarding , published documentation and templates , reduced ramp-up time for analysts.

## Projects

---

### Emergency Management Agency Portal (PHP, MySQL, HTML, CSS)

Aug 2019 - Dec 2019

- Digitize record-keeping for agency workflows , delivered a web portal using PHP/MySQL with HTML/CSS , improved data accuracy.
- Enable structured submissions , centralized entries and retrieval in a single system , reduced manual consolidation effort.
- Free team capacity for analysis , automated basic record updates , saved 40 hours/month (estimate).

Payments Analysis Tool (Python, Pandas, NumPy)

**Feb 2019 – May 2019**

- Provide finance metrics faster , implemented computations in Python with Pandas/NumPy , accelerated reporting cadence.
- Support planning reviews , produced consistent metric outputs for recurring cycles , reduced ad-hoc analysis time.
- Improve data reliability , structured calculation steps and checks , increased confidence in reported figures.

Degree Ranking of Illinois State (Python, NumPy, Matplotlib)

**2018 – Dec 2018**

- Analyze educational datasets , applied Python with NumPy/Matplotlib for data ranking , generated accurate degree ranking results across Illinois institutions.
- Visualize ranking outcomes , built comparative charts and summary tables , improved interpretation for academic stakeholders.
- Automate data refresh , created script-based updates , reduced manual reporting effort by 25% (estimate).

## Education

---

**Roosevelt University**

**December 2019**

*Master of Science, Computer Science*

*Chicago, IL*

## Certifications

---

- Microsoft Certified: Azure Fundamentals
- Microsoft Certified: HTML5

## Languages

---

- English – Full Professional Proficiency (C1)
