Parashara Bhattar

**Role:** BI Analyst   **Focus:** Power BI, Metrics, KPI Trees   **Strengths:** Data Storytelling, Trend Analysis

## Professional Summary

Data-Centric Analyst with 3+ years of experience in Quality Operations and Performance Metrics. Proven track record of transforming operational data into actionable business insights using Power BI, SQL, and Excel. Expert in designing interactive dashboards, defining KPI trees, and automating reporting workflows to reduce manual effort. Seeking to leverage data visualization and trend analysis expertise to drive business intelligence initiatives.

## Core Skills

- **BI & Visualization:** Power BI Desktop, DAX, Power Query (M), Dashboard Design, Data Storytelling
- **Metrics & Strategy:** KPI Definition, Funnel Analysis, Cohort Analysis, A/B Testing, SLA Monitoring
- **Data Analytics:** SQL (Joins, Aggregations), ETL, Data Cleaning, Trend Analysis, Root Cause Analysis (RCA)
- **Tools:** Excel (Advanced), Jira, Figma (UI for Dashboards), OpenAI API

## Professional Experience

### Concentrix

May 2022 - Present

*Senior Quality Analyst (Data & Reporting Focus)*

*Hyderabad, India*

- Own quality performance reporting for global moderation operations, ensure KPI visibility and reviewer accuracy.
- Build Power BI dashboards (DAX, Power Query) and model QA data for SLA adherence and defect taxonomy.
- Automate weekly trend packs and action logs, reduce manual reporting time by 40% for 10+ stakeholders.
- Improve Quality Scores from 80% to 97% via RCA-led SOP updates, calibrations, and training insights.

## Projects

AMORA (AI Recommendation Engine), Personal Project (Remote)

July 2024 - December 2024

- Built an AI recommendation engine mapping user mood signals to item attributes to reduce gift search effort.
- Designed relational data schema and prompt logic, tracked CTR and relevance metrics to refine recommendations.
- Prototyped dashboard in Figma and validated A/B tests, reduced search time by 30% in prototype trials.
