

VAIBHAV ROKDE

Bengaluru, India | +91 8010164521 | rokdevaibhavsatish@gmail.com | LinkedIn: Vaibhav Rokde

Professional Summary

Java Developer skilled in designing and developing web and enterprise applications using Java (8/11/17), Spring Boot, Hibernate, and RESTful APIs. Proficient in building scalable backend systems, integrating third-party APIs, and working with MySQL databases. Experienced in microservices architecture, Kafka-based messaging, and Docker-based deployments. Strong understanding of Agile development practices, debugging, and cross-functional team collaboration to deliver reliable and maintainable software solutions.

Skills

Programming Languages: Java (17, 8), Core Java, Object-Oriented Programming (OOP), Functional Programming, Multithreading, Data Structures and Algorithms (DSA)	Web & Application Technologies: J2EE, JSP, JSTL, Servlets
Frameworks & Libraries: Spring Boot, Spring MVC, Spring Core, Hibernate ORM	Database & Persistence: MySQL, JPA, Database Schema Optimization
API & Integration: RESTful APIs, Third-party API Integrations (Email, SMS, PDF, Payments)	Architecture & Messaging: Microservices Architecture, Kafka
Testing & Monitoring: Unit Testing, Log4j, Logback	IDEs & Tools: IntelliJ IDEA, Eclipse, Spring Tool Suite (STS), Postman, Swagger
Project Management: Agile Methodologies, Team Collaboration	DevOps & Deployment: Docker
	Version Control: Git, GitLab, GitHub

Work History

Java Developer Sixdee Technologies – India	01/2023 to Current
- Built and maintained backend systems across two enterprise-scale projects, including one developed from the ground up with over 15 APIs. - Designed and delivered two independent modules, enhancing scalability and supporting 1000+ daily user interactions. - Deployed and supported a live telecom solution (Cellcard), contributing to successful rollout across 3+ markets.	
Project	

Vodafone French Polynesia (VFP) – Asset Resource Management (ARM) Module	
Role: Java Developer	
Company: Sixdee Technologies	
Duration: Jan 2023 – Present	
Tech Stack: Java 11, Spring Boot 3+, Hibernate JPA, Kafka, Docker, MySQL, Eclipse, Swagger	
Project Description: Developed the Asset Resource Management (ARM) module for a telecom client to manage both physical and non-physical assets. The system includes modules for stock handling, transportation tracking, and integration with external services. The project is currently in the UAT phase.	
Responsibilities: - Developed Stock Request Flow and Transportation Flow modules to manage asset movement. - Built RESTful APIs using Spring Boot 3+ and Hibernate JPA, ensuring modular and maintainable code. - Integrated Kafka to enable asynchronous communication across microservices. - Utilized REST Template and Feign Clients to connect with external systems and services. - Deployed application services using Docker for environment consistency and scalability.	
Education	

Bachelor of Engineering Padre Conceicao College of Engineering - Verna, Goa, India	2022
Languages	

English	German
Bilingual or Proficient (C2)	Beginner (A1)
