Dear Hiring Manager,

I am writing to express my interest in the Java Developer position in Germany. With a strong foundation in backend development using Java, Spring Boot, and Hibernate, along with practical experience building scalable enterprise applications in the telecom domain, I am confident in my ability to contribute effectively to your development team.

Currently working as a Java Developer at Sixdee Technologies since January 2023, I have been responsible for building and maintaining backend systems across two major telecom projects. I developed scalable RESTful APIs using Spring Boot and Hibernate, integrated asynchronous communication through Kafka, and ensured deployment reliability using Docker. My key contributions include independently designing and implementing critical modules, including the Asset Resource Management (ARM) system for Vodafone French Polynesia. This involved developing Stock Request and Transportation Flows, integrating external APIs, and supporting successful deployments into live environments.

My technical toolkit includes Java (17/11/8), Spring Boot, Hibernate, JPA, MySQL, Kafka, Docker, Git, and RESTful services. I am also experienced with Agile methodologies and collaborative development practices, which allow me to work efficiently in cross-functional, fast-paced environments.

I hold a Bachelor of Engineering degree from Padre Conceicao College of Engineering, Goa. My academic background in software development, coupled with my hands-on industry experience, equips me with both the theoretical and practical knowledge needed to excel in enterprise-grade backend engineering.

Germany's strong tech ecosystem and focus on high-quality, scalable solutions align with my professional goals. I am particularly excited about contributing to innovative teams working on distributed systems and high-impact applications.

I would welcome the opportunity to further discuss how my background and skills align with your team's goals. Thank you for considering my application.

Sincerely,
Vaibhav Rokde
