Dear Hiring Manager,

With more than eleven years in healthcare and equipment financing across OEM captive finance, banks, and non bank lenders, I am keen to contribute to key account or structured finance roles in Germany. My work focuses on lease and loan structures that help hospitals, diagnostic chains, and small or mid sized enterprises invest in capital equipment while protecting yield and credit quality. This mix of commercial focus and portfolio discipline matches the needs of German healthcare and asset finance platforms that balance impact, risk, and long term relationships.

At Philips Capital I own regional healthcare equipment financing across five Indian states and Sri Lanka for hospitals and diagnostics. I design lease and loan structures for imaging and monitoring assets that fit hospital cash flows within defined risk limits and still meet return thresholds. Recent results include financed volume of about INR 240 crore in a single financial year, with INR 160 crore delivered in the first six months, plus the restart of the Sri Lanka franchise through re-priced lender programs that eased funding costs while holding margins. Earlier at Tata Capital I managed an INR 550 crore leasing portfolio in information technology and construction equipment, opened more than ten new enterprise and SME relationships, and consistently met or exceeded origination targets.

Broader experience across Hewlett Packard Financial Services, HDFC Bank, De Lage Landen, SREI, and YBCC gave me a wide view of asset classes and funding structures. I have managed vendor based funding for construction and manufacturing clients, structured and funded a greenfield project close to USD 1 million, scaled a construction equipment portfolio from INR 30 crore to INR 280 crore with negligible delinquency, and worked on non performing asset situations and sale and lease back solutions for large corporates. These roles strengthened my ability to work with credit, legal, and operations teams, to shape collateral and pricing, and to keep portfolio hygiene under control while still growing the book.

Germany offers a mature healthcare and industrial base with strong expectations on compliance, transparency, and long term partnership. I am learning German to support close work with local stakeholders and I am ready to relocate for the right opportunity. I would welcome the chance to discuss how this mix of healthcare equipment financing, multi country territory ownership, and structured asset finance experience can support your growth and portfolio goals in Germany.

Sincerely,
Jetender Singh Chauhan
