Summary

Mobile engineer with experience of 4 years building Android and iOS apps for learning, wallet and commerce. Delivers stable user flows, smooth navigation and fast releases for large user bases. Experienced in React Native, TypeScript and Redux, based in Bangalore, India and open to Germany roles.

Core Skills

- **Mobile Engineering:** React Native, TypeScript / JavaScript (ES6+), Redux, Navigation, AsyncStorage, Offline, i18n (mobile)
- **App Capabilities:** Deep Linking, Push Notifications, In-App Purchase, In-App Update, Form Validation, Error Handling
- **Release & Tools:** Play Console, App Store Connect, Android Studio, Xcode, Git, GitHub, REST / JSON, basic crash triage

Experience

Motion Education Pvt. Ltd

October 2024 – Present

React Native Developer

Bangalore, India

- Own RN delivery for Motion Learning App, aligned scope with product to sustain rapid release and device coverage.
- Optimize performance using list virtualization, memoization and image caching to improve perceived responsiveness.
- Implement In-App Update, Deep Linking and notifications to improve engagement and task completion at scale.
- Harden error handling and validation across critical flows, reduced user-facing failures in production.

Maestro Technology Services Pvt. Ltd

June 2021 – September 2024

React Native Developer, Frontend Team Lead

Coimbatore, India

- Delivered RN features for wallet, B2B commerce and media apps, coordinated with design and back end for releases.
- Used TypeScript/JavaScript (ES6+), Redux, Form Validation, Error Handling and i18n in mobile applications.
- Shipped Deep Linking, Push Notifications, In-App Purchase, managed store submissions and post-release fixes.
- Improved runtime stability with guarded routes and state persistence, strengthened edge case handling.

Projects

Store Releases & Links — Motion Learning App | Bangalore, India

- Published Android/iOS builds via Play Console and App Store Connect, maintained signing, provisioning and notes.
- Integrated deep linking, notifications and IAP across apps, supported attribution and secure purchase workflows.
- Executed performance and bundle optimizations, improved cold start, image policies and cache strategies.
- Live links: [PLAY STORE](#) | [APP STORE](#)
