Dear Hiring Manager,

I am writing to express my interest in a **Radiology Technologist** position in Germany. With over **six years of experience** at Medall Diagnostics, I have developed strong expertise in **X-ray and mammography imaging**, patient care, QA compliance, and cross-functional coordination within diagnostic workflows. I am licensed in India and prepared to adapt quickly to EU imaging standards, PACS/RIS systems, and regulatory documentation norms.

In my current role, I deliver safe and accurate imaging while ensuring patient comfort and compliance with **ALARA principles**. I routinely perform QA checks, maintain audit-ready records, and collaborate with radiologists and nurses to optimize image quality and reduce repeats. I also assist CT/MRI workflows and guide patients effectively to improve cooperation and outcomes. My focus on **radiation protection, infection control, and workflow efficiency** has consistently ensured high-quality imaging and operational readiness.

I hold a **B.Sc in Allied Health Science** and am proficient in **English (C1)** with ongoing development in **German (A2)** to support seamless integration into a German healthcare environment. I am motivated to bring my hands-on imaging expertise, patient-centric approach, and commitment to safety and quality to contribute effectively to your diagnostic team.

Thank you for considering my application. I look forward to the opportunity to discuss how my experience and skills can support your radiology operations.

Warm regards,

Sangavi L
