Summary

Assistant Professor and PhD candidate in Civil Engineering specialising in transport and pavement engineering, with 14+ years spanning university teaching, applied pavement research, and industry-facing field studies. Deliver outcome-based teaching in pavements, traffic engineering, transport planning, and laboratory programs aligned to clear rubrics and learning outcomes. Translate pavement survey and materials testing outputs into decision-ready technical reporting for rehabilitation planning, overlay inputs, and road safety investigations. **Publish peer-reviewed research on porous asphalt performance and hold a patent in pavement distress quantification.**

Key Skills

- **Teaching & Assessment:** Curriculum delivery, rubrics, outcome based education, LMS support
- **Transport & Pavements:** Pavement engineering, flexible pavements, overlay planning, rehabilitation planning
- **Surveys & Evaluation:** ROMDAS, NSV, Benkelman Beam deflection, bump integrator, skid resistance
- **Materials & Geotech:** Asphalt mix design, BC, DBM, SDBC, OGFC, porous asphalt, GSB, WBM, WMM
- **Traffic & Safety Exposure:** Traffic impact assessment, black spot assessment inputs, investigation reporting
- **Tools & Reporting:** MS Excel, MS Word, MS PowerPoint, technical writing, stakeholder coordination

Education

Ramaiah University of Applied Sciences <i>PhD, Civil Engineering (Pursuing)</i>	April 2019 – Present <i>Bengaluru, India</i>
UVCE, Bangalore University <i>ME, Highway Engineering</i>	2011 <i>Bengaluru, India</i>
KLS Gogte Institute of Technology (VTU) <i>BE, Civil Engineering</i>	2009 <i>Belgaum, India</i>

Experience

Ramaiah University of Applied Sciences <i>Assistant Professor, Civil Engineering (Highways and Transportation)</i>	June 2016 – Present <i>Bengaluru, India</i>
• Lead teaching, laboratory governance, and postgraduate supervision in transport and pavement engineering. • Deliver curriculum using rubrics, lab SOPs, and structured evaluation across theory and laboratory courses. • Sustain greater than 90% student feedback and subject results through continuous teaching uplift. • Supervise 35 postgraduate dissertations and drive publication drafting in pavements, safety, and mobility.	
Acharya Institute of Technology <i>Assistant Professor, Civil Engineering</i>	January 2012 – May 2016 <i>Bengaluru, India</i>
• Delivered teaching and laboratory learning across pavements, traffic engineering, transport planning, and geotech. • Ran materials and geotechnical laboratories using SOP-based testing and consistent QA documentation. • Improved student outcomes by guiding 15 capstone projects across asphalt mixes, distress, and safety. • Supported department operations via coordinator roles across facilities, disciplines, and academic processes.	

Research & Publications

Journal Publication: Porous asphalt permeability and surface runoff performance	2024
• Investigated permeability of open and dense graded asphalt mixes and quantified surface runoff behaviour. • Applied structured testing and analysis to compare mix types and interpret drainage performance outcomes. • Published in <i>Discover Civil Engineering</i> (Springer Nature), 2024 to share results with practitioners.	

Intellectual Property (IP): Patent in pavement distress quantification**December 2020**

- Developed method, device, and apparatus for quantification of pavement distress for field-ready assessment.
- Filed patent: 202041056119 dated 12/23/2020 to formalise novelty and protect implementation approach.
- Strengthened repeatable distress evaluation workflows to improve consistency across assessors and sites.

Postgraduate Supervision: PG dissertations guided**June 2016 – Present**

- Guide 35 postgraduate dissertations across pavements, porous asphalt, safety audits, and mobility themes.
- Coach research design, lab testing, and technical writing to improve rigour and on-time submission quality.
- Deliver practice-oriented topics including black spot identification, road safety audit, and pavement upgrades.

Conference Proceedings: International and National**2013 – 2015**

- Presented studies on coir and polypropylene fibres in SDBC Grade-2 mixes at ICCE-2013 (Bengaluru).
- Presented work on e-waste ceramic as aggregate replacement and e-waste context at ICICE-2013 (Bengaluru).
- Presented reclaimed asphalt with polypropylene fibres and related topics at ICCE-2015 (Acharya, AIT).
- Contributed to FOSET 2015 and CC-2015 seminar on pavement impacts and climate-related performance links.

Professional Development / Memberships

- Associate Member, The Institution of Engineers India (AM-141345-5), since 2010
- Life Member, Indian Society of Technical Education (LM-85134), since 2012
- Life Member, Indian Road Congress (LM-39416), since 2012
- Life Member, Indian Geotechnical Society (LM-3554), since 2012
- Member, Solid Waste Management and Environmental Engineering Research Center (SWMEE), RUAS, June 2016 – Present
- Library Coordinator, Department of Civil Engineering, AIT, January 2012 – May 2016
- Geotechnical Engineering Laboratory In-Charge, June 2014 – May 2016
- Department Coordinator, Acharya Institute Proctorial System (AIPS), February 2015 – May 2016
- Coordinator, Nature Watch (Eco-Club), February 2012 – May 2016
- Internal Test Coordinator and Disciplinary Committee Coordinator, February 2012 – February 2013
- Traffic simulation tools workshop, November 2019 – January 2020
- Transportation Planning and Traffic Management workshop, IIT Bombay, July 2017
- Flexible pavements and modified binders workshop, IIT Madras, October 2016
- Econometric modelling of cross-sectional and time series data, IIT Roorkee, June – July 2015

Languages

- English – Full Professional Proficiency (C1)
