

Dear Hiring Team,

I am applying for a Senior AI Product Manager role. I bring over 10 years of experience across FinTech, EdTech, Retail, and Automotive, building and shipping AI and GPT-powered products that deliver measurable business impact.

Recently, I delivered GPT-based analytics that increased engagement by 31% and conversions by 18%, while reducing CAC by 22%. I also built a GPT-4 + Pinecone RAG evaluation framework that reduced answer errors by 25% and enabled compliant rollout for EU stakeholders. Previously, I led the development of a GPT-powered talent matcher that automated 80% of manual review and improved placement rates by 35%.

I have end-to-end experience across discovery, PRDs, A/B testing, RAG architectures, GDPR/EU AI Act compliance, and cross-functional execution from concept to launch. I am open to relocation to Germany and available to join immediately.

Thank you for your consideration. I look forward to the opportunity to discuss how I can contribute.

Sincerely,

Vimal Ramakrishnan
