Dear Hiring Manager,

I am writing to express my interest in a customer support or technical support position in Germany. With over 7 years of experience spanning healthcare, edtech, social media, and IT hardware support, I bring a proven ability to resolve complex customer issues, maintain high service quality, and deliver measurable results in fast-paced, global environments. Holding a valid German work visa, I am available for immediate relocation and contribution to your team's success.

In my current role as Customer Support Analyst II at GHX, I provide end-to-end technical and application support for over 200 healthcare providers and suppliers each month. Leveraging expertise in GHX platforms such as Exchange, NEXUS, and ePay, I consistently achieve SLA compliance of 95% and data accuracy rates of 98% in Salesforce CRM. My work involves close collaboration with cross-functional teams to investigate systemic issues, resulting in a 15% reduction in repeat tickets.

Previously at Genpact, I delivered international voice support for Meta platforms, handling up to 60 user inquiries daily while maintaining customer satisfaction above 90% and achieving high first-call resolution rates. At Accenture, as a Trust and Safety Associate, I processed thousands of pieces of user-generated content daily with 98% accuracy, ensuring compliance with legal standards and community guidelines while safeguarding user privacy. My early career at Anshul Vohra and Associates built my attention to detail and operational discipline through precise GST data management.

I hold a Bachelor of Computer Applications in Computer Science from Guru Nanak Dev University and professional certifications including Field Technician Computing & Peripherals (PMKVY) and AWS Cloud Computing (Udemy). My technical proficiency includes Salesforce, Okta (IAM/SSO), ServiceNow (ITSM), and Microsoft Excel, complemented by strong customer service, communication, and multitasking capabilities.

I am confident that my experience in managing diverse customer interactions, combined with technical expertise and process improvement skills, aligns well with the needs of a dynamic organization in Germany. I would welcome the opportunity to discuss how I can contribute to your team's goals.

Thank you for your time and consideration. I look forward to the possibility of an interview.

Sincerely,
Jaskaran Singh
