Chancenkarte (Opportunity Card) Visa Holder – Germany

Subject: Application for Production / Manufacturing Engineer Position – Germany

Dear Hiring Manager,

I am writing to apply for Production / Manufacturing Engineer opportunities in Germany. I am a Mechanical Engineering graduate with over 3 years of hands-on experience in production operations, process improvement, and team supervision, currently working as a Production Engineer at Featherlite Products Pvt. Ltd. I hold a valid Germany Chancenkarte visa and am actively seeking to contribute to Germany's advanced manufacturing sector.

In my current role, I manage end-to-end production activities while ensuring strict compliance with quality, safety, and delivery targets. I have successfully resolved 25+ technical and process-related issues, reducing downtime by 30%, and led multiple process optimization initiatives that improved production efficiency by 20%. I also supervise and train shop-floor teams of up to 15 members, improving productivity and reducing error rates.

Previously, as a Junior Production Engineer, I supported daily production planning and execution, consistently achieving 95% on-time delivery. I identified line bottlenecks and implemented corrective actions that reduced inefficiencies by 25%, while improving workforce productivity through effective task allocation and performance monitoring.

I hold a Bachelor of Technology and a Diploma in Mechanical Engineering, with strong practical exposure through projects such as titanium alloy forging for aerospace applications (LCA) and the design of a four-way hacksaw machine. My skill set includes production operations, troubleshooting, process improvement, SolidWorks, AutoCAD, and team leadership. I am fluent in English (C2) and currently learning German (A1), with strong motivation to advance my language proficiency.

Germany's focus on engineering excellence, lean manufacturing, and continuous improvement strongly aligns with my professional goals. I am confident that my shop-floor experience, problem-solving ability, and readiness to relocate will allow me to add value to your organization.

I would welcome the opportunity to discuss my application further. Thank you for your time and consideration.

Yours sincerely,
Harish S
