Summary

Senior Java Developer & Project Manager with 18+ years of experience in delivering enterprise platforms across healthcare, media, and BFSI. Leads cross-functional delivery across roadmap, sprint execution, risk, releases, and production support for integration-heavy systems. Deep experience in Java 8, Spring Boot, REST APIs, messaging, and RDBMS with disciplined SDLC and Agile Scrum leadership. Translates requirements into executable plans, architecture decisions, and prioritized backlogs with clear stakeholder alignment. Drives RCA-led incident resolution, quality gates, and mentoring across onshore and offshore teams.

Core Skills

- **Delivery & Leadership:** SDLC, Agile Scrum, Sprint Planning, Estimation, Risk & Dependency Management, Releases, Stakeholder Management
- **Backend:** Java 8, Spring, Spring Boot, Microservices, REST APIs, Swagger, JDBC
- **Messaging & Integration:** JMS, ActiveMQ, Kafka, Batch Processing, Unix Shell, XSLT
- **Data:** Oracle SQL, PL/SQL (packages, procedures, triggers), MySQL, SQL Server, Cassandra
- **Platforms:** OpenShift, PCF, Tomcat, WebLogic, WebSphere, JBoss, Wildfly
- **Quality & Tools:** JUnit, Mockito, EasyMock, JMeter, Tosca, Git, Jira, Confluence, Grafana

Experience

Cognizant - Project: CAI (Conversational Artificial Intelligence) **August 2019 - Present**

Technical Project Manager, Scrum Master - Client: ESI, Cigna - Healthcare Domain *Bengaluru, India*

- Own delivery for healthcare outbound messaging and IVR modernization across ESI and Cigna programs.
- Lead sprint planning and delivery for 3 outbound teams (8-10 members each), tracking dependencies in Jira.
- Deliver Spring Boot services using REST, JMS, and ActiveMQ, improve release stability.
- Drive RCA for incidents and ship preventive fixes, reduce repeat production issues.
- **Kore.ai Certifications:** Search AI (Basic), Search AI (Advanced), Agent Assist, Contact Center AI.

Larsen and Toubro Infotech - Project: Media Broadcast Technology **September 2017 - July 2019**

Team Lead - Client: HBO, Hauppauge, NY *Hauppauge, NY (Remote/Offshore)*

- Lead Agile delivery for HBO content workflow modernization across linear and non-linear distribution.
- Built microservices and REST integrations for ingestion-to-distribution flows, improved reliability by 10%.
- Strengthened quality via unit tests and code reviews, lowered defect leakage by 12%.

Larsen and Toubro Infotech - Project: Agility Harmony **March 2015 - August 2017**

Senior Java Developer - Client: Epsilon, Mumbai *Mumbai, India*

- Delivered backend features for a multi-channel email marketing platform supporting enterprise campaigns.
- Implemented Java and Spring Boot modules and APIs, integrated Kafka and monitoring via Grafana.
- Resolved defects using RCA and regression-safe fixes, improved campaign execution stability by 10%.

Larsen and Toubro Infotech - Project: Service Configuration for MIND**March 2014 - February 2015***Senior Java Developer**Mumbai, India*

- Migrated scheduling and metadata services into a configurable platform for non-linear media workflows.
- Implemented Hermes JMS message flows and XSLT transformations, ensured compliant metadata outputs.
- Automated migration steps with PL/SQL scripts, reduced manual deployment effort by 25%.

Accenture - Project: Position Management Central Security Depository**August 2013 - February 2014***Java Developer - Client: Clearstream, Germany**Mumbai, India*

- Built modules for Clearstream securities processing across reporting, rule engine, and booking flows.
- Implemented decoding logic using multi-table lookups and weighted rules for instruction state accuracy.
- Improved unit test coverage to 80%, increased release confidence and reduced regressions by 10%.

Accenture - Project: Universal Credit (Agile)**October 2011 - July 2013***Senior Developer - Client: UK Government - Department for Work and Pensions**Mumbai, India*

- Delivered features for UK Government Universal Credit across integration and evidence modules.
- Strengthened exception handling and transaction stability, reduced recurring defects by 10%.
- Maintained delivery hygiene across Agile ceremonies, defect lifecycle, and stakeholder status updates.

Accenture - Project: Aristos**February 2011 - September 2011***Java Developer - Client: AT&T**Mumbai, India*

- Built features for AT and T scheduling and resource management tools, integrating with legacy systems.
- Implemented Swing MVC components and JDBC integrations, improved data accuracy by 10%.
- Validated web service integrations and fixed defects through structured debugging and RCA.

Mindcraft - Project: B2B Oil Exchange, CSI Portal Application**November 2009 - January 2011***Java Developer - Client: HPCL, Computer Society of India**Mumbai, India*

- Delivered portal and B2B tracking features using JSP and Struts for registration and payments.
- Fixed Billdesk payment response flow by correcting portlet and HTTP response handling logic.
- Reduced failed payment confirmations by 30% and improved customer completion rates by 10%.

HDFC Bank - Project: UBS Charging System**June 2007 - October 2009***Java Developer - Client: HDFC Bank**Mumbai, India*

- Built charging logic for AMB and AQB fee calculations and recovery workflows in UBS Charging System.
- Produced technical specs and supported production issues with end users to restore service quickly.
- Improved billing accuracy by 10% through validation rules and defect fixes in core modules.

Education

K. C. College of Engineering**August 2006***Bachelor of Engineering in Information Technology (BEIT)**Thane, India***Certifications & Awards**

- NCFM Financial Markets Beginners Module
- Introduction to SQL 9i Beginners Module
- Spot Award, Fancast Migration, MIND Project

Languages

- English - Full Professional Proficiency (C2)
- German - Intermediate Working Proficiency (B1)
