Summary

Azure Data Engineer with 4 years of experience designing scalable data pipelines and cloud-based analytics solutions. Strong expertise in Azure Data Factory, Databricks, PySpark, and SQL. Proven track record in building ETL workflows, optimizing data processing, and enabling data-driven decision making. Experienced in real-time and batch processing architectures and cloud migration initiatives. Strong collaborator in Agile environments delivering reliable data systems.

Core Skills

- **Data Engineering:** ETL Development, Data Pipelines, Data Integration, Data Warehousing
- **Databases:** Snowflake, Azure SQL DB, MySQL, Redshift
- **Programming:** Python, SQL, PySpark
- **Cloud & Tools:** AWS Glue, Lambda, S3, Power BI, Advanced Excel
- **Azure Stack:** Azure Data Factory, Azure Databricks, ADLS Gen2, Delta Lake, Stream Analytics
- **Data Concepts:** Data Lakes, Cloud Migration, Data Orchestration

Experience

Tata Consultancy Services (TCS)

March 2024 – Present

Azure Data Engineer

Hyderabad, India

- Design and implement ADF-based data pipelines for multi-source ingestion by orchestrating ETL workflows, handling 50+ data pipelines across structured and unstructured sources.
- Develop optimized PySpark workflows in Azure Databricks by tuning transformations and resource utilization, improving processing efficiency by 40%.
- Build real-time streaming solutions using Azure Stream Analytics and Delta Lake by enabling continuous data ingestion, reducing data latency by 30%.
- Integrate ADF with ADLS Gen2 by designing scalable storage architecture, supporting TB-scale data processing with high reliability.
- Lead cloud migration from Oracle on-premises to Databricks and Snowflake by validating data pipelines and transformations, ensuring data accuracy.

Tata Consultancy Services (TCS)

February 2022 – March 2024

AWS Data Engineer

Hyderabad, India

- Develop and orchestrate ETL pipelines in AWS Glue using PySpark by processing millions of records daily for large-scale transformations.
- Automate data workflows using AWS Step Functions, Lambda, and S3 triggers by reducing manual intervention and improving operational efficiency by 60%.
- Migrate and transform data from MySQL to S3 and Redshift using Glue Dynamic Frames by improving query performance by 35%.
- Create and manage data catalogs using AWS Crawlers and Athena by enabling schema evolution and structured data discovery.
- Collaborate with stakeholders and clients by ensuring data integrity and implementing automated alerts using SNS for pipeline monitoring.

Education

Raghu Engineering College

2016 – 2020

Bachelor of Technology in Mechanical Engineering

Visakhapatnam, India

Certifications

- AWS Certified Cloud Practitioner – Amazon Web Services (AWS)
- AWS Certified Developer – Associate – Amazon Web Services (AWS)
- Microsoft Certified: Azure Data Fundamentals – Microsoft
- ETL and Data Engineering Courses – Udemy

Achievements

- Recognized for exceptional performance and key contributions to data migration and cloud transformation projects in enterprise environments.
- Received Elevate Wings Award for outstanding performance and contribution to critical delivery initiatives in data engineering programs.
- Consistently delivered high-quality data engineering solutions under tight deadlines, ensuring reliable and scalable data pipeline delivery.

Languages

- English – Full Professional Proficiency (C1)
- German – Intermediate Proficiency (B1)
