Summary

DevSecOps Engineer with 12+ years of experience integrating application security into enterprise software delivery. Expertise in CI/CD security, SAST, DAST, and SCA tooling across cloud and hybrid environments. Strong background in security automation, infrastructure as code, and container security. Proven ability to scale secure development practices across microservices and legacy systems. Experienced in enabling developer velocity through shift-left security and automation-driven workflows.

Core Skills

- **Security Tools:** SAST (Checkmarx, SonarQube, Coverity), DAST (Burp Suite, OWASP ZAP), SCA (Black Duck, Snyk), Threat Modeling, Penetration Testing
- **Infrastructure & Automation:** Terraform, Ansible, Docker, Kubernetes, GitOps, CI/CD Integration, SAP Integration, Supply Chain Automation
- **Programming:** Expert in Python; Proficient in C++, Go; Familiar with JavaScript, Java
- **Testing & Automation:** Selenium WebDriver, TestNG, Maven, Test Automation Frameworks, DFMEA Analysis
- **Embedded Systems:** CAN Protocol, Automotive Systems, Firmware Development, RTOS
- **AI & NLP:** RASA Framework, NLU Pipelines, Chatbot Development, Dialog Management
- **Cloud Platforms:** AWS, Azure, Hybrid Cloud Security
- **Security Frameworks:** OWASP Top 10, CIS Controls, DevSecOps, Shift-Left Security
- **Version Control:** GitLab, GitHub Enterprise, Azure DevOps

Experience

Dell Technologies

April 2022 – Present

DevSecOps Engineer

Bengaluru, India

- Lead security integration across CI/CD pipelines, Infrastructure-as-Code (Terraform, Ansible), and hybrid cloud (AWS, Azure) environments, covering 1000+ microservices and 100+ legacy apps.
- Architect and operate enterprise SAST/DAST/SCA platforms (Checkmarx, SonarQube, Coverity, Black Duck, Snyk, Burp Suite) enabling automated vulnerability detection at every commit.
- Develop Python automation frameworks for security orchestration, API integrations, and reporting, reducing manual reviews by 70% and detection time from weeks to <24 hours.
- Establish and maintain threat modeling, penetration testing, and compliance initiatives (OWASP Top 10, CIS Controls), improving risk visibility for Business Unit leadership.

Alorica

April 2019 – April 2022

Conversational AI Developer

Bengaluru, India

- Designed and deployed production-grade chatbot using RASA framework handling 10,000+ daily interactions across web, mobile, and messaging platforms.
- Implemented NLU pipelines, dialog management, and multi-channel deployment integrated with order management and payment systems.
- Optimized bot performance via continuous training, intent refinement, and A/B testing, achieving 85%+ intent recognition accuracy.
- Collaborated with cross-functional teams to align AI solutions with business requirements and operational workflows.

Capgemini

January 2018 – April 2019

Automation Engineer

Bengaluru, India

- Developed workflow automation and integration frameworks for enterprise clients (Honeywell, Novo Nordisk), reducing manual processing by 50%.
- Created Python and shell scripts for data migration, monitoring, and reporting, ensuring compliance with industry standards.
- Collaborated with cross-functional teams to design and implement automation aligned with operational objectives.

Swagene

September 2014 – December 2017

Selenium Test Engineer

Bengaluru, India

- Developed and maintained Selenium-based automated test suites, improving web application test coverage by 60%.
- Designed test automation frameworks (Java, TestNG, Maven) implementing page object model for maintainability.
- Integrated automated testing into CI/CD pipelines, accelerating release cycles and ensuring consistent QA coverage.
- Created detailed test plans, cases, and reports to improve visibility into application quality and release readiness.

Tata Consultancy Services (TCS)

November 2012 – November 2013

Embedded Engineer

Hyderabad, India

- Developed and tested embedded software for automotive systems using C/C++ and RTOS, focusing on CAN communication protocols.
- Conducted DFMEA analysis and implemented preventive measures to ensure reliability and performance of embedded systems.
- Performed hardware-software integration testing and collaborated with engineers to optimize power consumption, memory, and system performance.

Education

Vivekananda Institute of Technology

2008 – 2012

Bachelor of Engineering in Electronics & Communication

Bengaluru, India

Key Achievements

- Created security scoring system for Business Unit leadership, providing executive visibility into organizational security posture.
- Reduced vulnerability detection time from weeks to hours through automation and parallelized scanning workflows.
- Built Scanning-as-a-Service platform using containerized SAST/DAST/SCA tools, enabling on-demand security analysis.
- Achieved 70%+ automation in security reviews, eliminating manual verification for routine code commits.

Certifications

- GIAC Network Forensics – Global Information Assurance Certification
- Oracle AI Certified Professional – Oracle Corporation

Languages

- English – Full Professional Proficiency (C1)
- German – Intermediate Proficiency (B1)
