Dear Hiring Manager,

I am writing to express my interest in Data Analyst, Business Intelligence, or Data Operations roles within your organization. With 2 years of professional experience in data analysis, ETL monitoring, and reporting, I bring strong expertise in SQL, Power BI, and data validation to support data-driven decision-making in enterprise environments.

In my current role at Tech Mahindra, I monitor and support Oracle Data Integrator (ODI) ETL pipelines to ensure stable data operations and timely resolution of production issues. I have hands-on experience in writing and optimizing complex SQL queries for data extraction, transformation, and reporting. I also perform data validation and reconciliation across business datasets to ensure high data accuracy and consistency. Additionally, I design and maintain Power BI dashboards that reduce manual reporting effort and provide actionable insights to stakeholders. I actively manage incidents, service requests, and change workflows using JIRA Service Desk in alignment with ITIL processes, ensuring SLA compliance and operational stability.

My experience has strengthened my ability to work in structured, process-driven environments while collaborating with cross-functional teams to deliver reliable and high-quality data solutions. I am comfortable working in Agile environments and have a strong foundation in analytical thinking, problem-solving, and stakeholder communication.

I am particularly interested in opportunities in Germany because of its strong focus on data-driven decision-making, structured enterprise IT environments, and advanced analytics adoption across industries, which align closely with my experience in SQL, Power BI, and ETL-based data operations. I bring strong English communication skills and intermediate German proficiency, enabling effective collaboration in international teams.

I would welcome the opportunity to contribute my skills in data analysis, reporting, and ETL operations to support your organization's business objectives. Thank you for your time and consideration.

Sincerely,
Naveen Sai Sadhanala
