Dear Hiring Manager,

Technical Account Manager with 15+ years of experience driving customer success, SLA governance, and cloud adoption across enterprise environments, I am applying for Technical Account Manager opportunities within your organization.

In my current role, I serve as the primary technical advisor for enterprise clients, managing escalations, conducting Quarterly Business Reviews (QBRs), and ensuring SLA compliance of up to 98% across critical services. I have led cross-functional initiatives that improved delivery efficiency by 20% while enabling stronger customer engagement and long-term retention.

My experience spans hybrid and SaaS cloud environments (AWS, Azure, GCP), where I have supported large-scale onboarding, infrastructure transitions, and ITIL-aligned service operations. I have consistently contributed to achieving 99% uptime, reducing onboarding timelines, and identifying opportunities for service optimization and revenue expansion.

I bring strong expertise in customer lifecycle management, stakeholder engagement, and technical advisory, supported by certifications including PMP, Scrum Master, ITIL, and ISO 27001.

I am currently preparing for relocation to Germany under the Opportunity Card pathway and possess A2-level German proficiency, enabling effective integration into local teams and client environments.

I would welcome the opportunity to contribute to your organization by enhancing customer success, optimizing service delivery, and driving strategic account growth.

Sincerely,

Avinash Singh Thakur
