Dear Hiring Manager,

I am applying for Customer Connect Manager, Key Account, Commercial Excellence roles in Germany within crop protection and agrochemicals. I **bring 10 years of experience driving demand generation, territory execution, and KPI delivery across multi-stakeholder field ecosystems**. At **Bayer Crop Science**, I run customer-connect programs across Telangana and keep quarterly plans on track through clear execution rhythms, campaign visibility, and disciplined follow-through across sales and operations.

I deliver outcomes that Germany-based commercial teams prioritize and that include reliable KPI tracking, structured territory planning, and operational risk control across seasons. In my current role, I **own quarterly KPI delivery and close service and stock gaps by partnering with 10+ stakeholders across sales and operations**. I build contingency plans early, align field actions to reduce execution drift, and keep performance predictable at retail points. Earlier, I **supported 20+ retail points and 5+ dealers as a Sales Supervisor** at Bayer, strengthening retail execution through weekly reviews, rapid issue resolution, and consistent campaign execution.

I also bring strong launch and GTM discipline. At **Tata Rallis**, I drove district-level execution for new agrochemical launches by planning campaigns, running demos, and improving dealer engagement through structured follow-ups. I tracked competitor moves and customer feedback to sharpen messaging and offer timing, which improved pull-through at retail points. At **Mahindra Summit Agri Science**, I built territory growth through channel coverage improvements, retailer enablement, and joint plans with cross-functional teams, while managing stakeholder touchpoints to remove blockers quickly.

I will add value in Germany by **aligning commercial plans with execution reality**, forecasting field risks, protecting service levels, and improving demand generation performance through clear governance and measurement. I work comfortably in cross-functional setups, operate with strong process discipline, and keep teams focused on on-time delivery. I speak English at C1 and German at B1, and I am ready to relocate to Germany.

Sincerely,

Ganesh Sindhe
