Dear Hiring Manager,

I am writing to express my interest in **Business Development** opportunities within your organization. With over 8 years of experience in renewable energy and solar EPC, I bring strong expertise in techno-commercial bid management, government tendering, and client acquisition across utility-scale and rooftop solar projects.

In my current role at **Zetwerk Manufacturing Business Ltd**, I drive end-to-end tendering for solar EPC projects, including preparation of techno-commercial bids, BOQs, and cost estimates for large-scale installations. I have successfully secured projects worth ₹2000 Cr by leading competitive bid strategies and commercial negotiations with key clients such as MSPGCL and Coal India. My experience includes developing detailed cost models for substations and transmission infrastructure, conducting vendor evaluations, and strengthening bid quality through technical simulations and pre-bid engagements.

Previously, at **Usolar Clean Energy Solutions**, I managed government and private sector tenders across multiple e-procurement platforms, improving bid success rates through structured tracking and competitive analysis. I also performed financial feasibility studies, including ROI and IRR analysis, and led cross-functional coordination to ensure timely and high-quality bid submissions.

During my tenure at **RSSUNPOWER Energy**, I led business development initiatives by driving market research, preparing techno-commercial proposals, and building strong client relationships to convert leads into project opportunities. Earlier, at Sun Factory GmbH, I supported supply chain and business development activities, including proposal preparation, project coordination, and client engagement, strengthening my end-to-end understanding of solar project lifecycles.

I am particularly interested in opportunities in Germany, where I can contribute my experience in renewable energy, tendering strategy, and stakeholder management within structured and innovation-driven environments. With my strong technical-commercial expertise, experience in large-scale solar projects, and German language proficiency (B1), I am confident in my ability to add value to your organization.

I would welcome the opportunity to discuss how my experience aligns with your business goals and project requirements.

Thank you for your time and consideration.

Sincerely,
Geethaa N
