Summary

Senior QA Automation Engineer with 11+ years of experience in test automation, API testing, and quality engineering across web applications in e-commerce, SaaS, and CRM domains. Strong expertise in Selenium, Java, and automation frameworks with focus on improving test coverage and release quality. Experienced in building scalable automation solutions and integrating validation into CI/CD pipelines. Proven ability to reduce regression effort and improve defect detection. Skilled in Agile delivery and cross-functional collaboration.

Core Skills

- **Test Automation:** Selenium WebDriver, Cypress, Playwright, UI Automation, Test Framework Design, Page Object Model, Hybrid Framework, Cucumber BDD
- **CI/CD & DevOps:** Jenkins, Build Validation, Continuous Testing
- **Security Testing:** OWASP ZAP
- **Programming:** Core Java
- **Build Tools:** Maven
- **API Testing:** Rest Assured, Postman, API Validation
- **Other Tools:** SikuliX
- **Test Management:** TestRail, qTest, HP ALM, JIRA

Experience

Tata Technologies

August 2024 – Present

Technical Lead – QA / Test Automation

Pune, India

- Defined test strategy, plans, and reviewed test scenarios to ensure coverage, traceability, and alignment with functional specifications.
- Designed and implemented Selenium TestNG automation framework using Page Object Model to improve scalability and maintainability of test suites.
- Led a team of 5 QA engineers by assigning tasks, mentoring automation practices, and ensuring on-time delivery of QA milestones.
- Integrated automated test execution into CI/CD pipelines using Jenkins, reducing feedback cycle time by 40% for build validation.
- Accelerated test case design by 40% using AI-assisted tools to generate functional, negative, and edge-case scenarios from requirements.
- Built AI-augmented automation using Playwright and streamlined API testing via OpenAPI/Swagger-based scenario generation, reducing manual scripting effort by 50% and improving coverage.

Conga

July 2020 – August 2024

Senior Software Engineer – QA / Test Automation Engineer

Pune, India

- Stabilized and optimized existing smoke and regression automation suites to improve reliability and reduce execution failures across releases.
- Developed UI and API automation test coverage using Selenium WebDriver, Java, and REST Assured for multiple product modules.
- Enabled post-deployment validation by integrating automated regression suites into higher environment release cycles.
- Led QA execution activities across functional and automation streams while collaborating with cross-functional engineering teams.
- Reduced regression testing cycle time by improving test execution efficiency and optimizing automation scripts across core product modules, resulting in 30% faster release validation cycles.

Infogen Labs Inc.**April 2019 – July 2020***Senior Software Test Engineer**Pune, India*

- Executed end-to-end manual testing of cross-editor plugin applications across VS Code, IntelliJ, Atom, Sublime, and Visual Studio.
- Automated user onboarding workflows using SikuliX and Java to improve regression efficiency across multiple IDE environments.
- Acted as single point of contact (SPOC) for QA during client interactions and requirement clarifications.
- Validated application functionality and ensured defect reporting accuracy across release cycles.

Infogen Labs Inc.**June 2017 – March 2019***Software Test Engineer**Pune, India*

- Performed end-to-end testing of food ordering web applications including functional, regression, and sanity testing.
- Validated REST APIs using Postman to ensure response accuracy, data integrity, and service reliability.
- Built hybrid automation framework using Selenium WebDriver, Java, Maven, and TestNG with Page Object Model.
- Managed defect lifecycle in JIRA including logging, tracking, and retesting of resolved issues.

Coreview Systems**August 2014 – June 2017***Quality Analyst**Pune, India*

- Executed UAT, functional, regression, and smoke testing for CRM Visa applications in client-facing environments.
- Prepared and executed detailed test cases to validate business workflows and system behavior.
- Coordinated directly with clients and offshore teams to ensure defect resolution and requirement clarity.
- Supported testing activities by ensuring documentation accuracy and timely reporting of issues.

Education

Punjab Technical University**2010 – 2014***Bachelor of Engineering in Electronics and Communication Engineering**Punjab, India***Languages**

- English – Full Professional Proficiency (C1)
- German – Intermediate Proficiency (B1)
