Dear Hiring Manager,

I am writing to express my interest in Network Planning, Telecom Delivery, and Network Operations roles within your organization. With over 9 years of experience in Ethernet network planning and build operations, I bring strong expertise in telecom infrastructure design, service delivery management, and large-scale network execution within BT Openreach environments.

In my current role at Tata Consultancy Services (Client: BT Openreach), I manage end-to-end Ethernet planning and build activities, ensuring SLA-driven delivery and high-quality network deployment. I have experience working with tools such as PIPeR and Orion for network design validation, coordinating large offshore teams, and ensuring smooth execution of high-volume telecom orders. I have also contributed to improving delivery efficiency through process optimization, desktop survey enhancements, and automation-driven workflow improvements.

Throughout my career, I have developed strong capabilities in FTTP deployment, Ethernet planning, QoS compliance, and SLA management. I have worked closely with cross-functional teams to ensure accurate network design, timely delivery, and effective issue resolution through RCA and quality governance processes. My experience in managing large teams and coordinating with client stakeholders has strengthened my ability to deliver consistent operational performance in complex environments.

I have been recognized for my contributions through multiple awards, including Employee of the Year and client appreciation from BT Openreach leadership, reflecting my commitment to delivery excellence and service quality.

Germany's focus on advanced telecom infrastructure, engineering precision, and process-driven delivery aligns well with my professional background. I am confident in my ability to contribute to network planning and operations teams by improving efficiency, ensuring SLA compliance, and supporting high-quality telecom service delivery. I also have intermediate German proficiency and am actively improving my language skills to integrate effectively into the professional environment.

Thank you for considering my application. I would welcome the opportunity to discuss how my experience in telecom network planning and delivery can contribute to your organization.

Sincerely,

Mohan Chandaka
