Summary

Full Stack Engineer with 7+ years of experience building scalable web applications, APIs, and enterprise platforms. Strong expertise in Node.js, TypeScript, React, and Django. Proven ability to design modular architectures, optimize backend performance, and deliver high-quality software in agile environments. Experience in SaaS, procurement platforms, and ad-tech systems with focus on maintainability and system scalability.

Core Skills

- **Backend Development:** NodeJS, NestJS, Django, Django-Rest, .Net, REST APIs
- **Frontend Development:** ReactJS, Angular, Vite
- **Programming Languages:** TypeScript, JavaScript, Python
- **Databases:** PostgreSQL, MongoDB, Couchbase, MySQL
- **Architecture:** Monorepo, Microservices, Domain-driven Design
- **Testing:** Jest, Supertest
- **Cloud & Storage:** AWS, S3
- **Developer Tools:** npm, Turborepo, ESLint, Git

Experience

CAW – Aerchain

November 2025 – Present

Tech Lead

Hyderabad, India

- Lead development of AI-driven procurement platform by building scalable frontend modules in React and backend APIs in TypeScript, improving system performance and modularity.
- Architect monorepo structure using pnpm and Turborepo to standardize shared packages and streamline multi-application development workflows.
- Enhance engineering quality by implementing automated testing, linting, and Git hooks, reducing defects by 30% and improving code consistency.
- Mentor engineers and drive code reviews to enforce best practices and ensure reliable cross-module integration.

CAW – Eshet Tours

January 2025 – Present

Full Stack Developer

Hyderabad, India

- Develop and maintain back-office travel platform using Angular and .NET, supporting core business operations for agents and finance teams.
- Refactor legacy booking systems into unified product-centric architecture, improving data consistency and reducing system complexity by 25%.
- Manage document storage and retrieval using Couchbase to ensure availability and performance for financial records.
- Resolve production issues and enhance invoice and payment modules to improve accuracy and system reliability.

CAW – Interakt CTWA

April 2025 – September 2025

Full Stack Developer

Hyderabad, India

- Build ad-tech platform integrating Meta APIs to enable automated ad creation and campaign workflows for WhatsApp-based marketing.
- Develop backend services using Django and scalable frontend components using React, improving feature delivery speed by 20%.
- Design and manage MongoDB data models to support high-volume ad transactions and real-time processing.
- Collaborate with product teams in agile sprints to align platform capabilities with advertising ecosystem requirements.

CAW – Master-O

October 2024 – January 2025

Senior Node.js Engineer

Hyderabad, India

- Own LMS and sales enablement modules by developing scalable backend services using Node.js, MySQL, and Prisma.
- Implement dynamic configurations and reusable UI components, reducing development effort by 30%.
- Optimize database queries and backend performance, improving response time by 25%.
- Integrate AWS S3 for media handling and build analytics tracking to support business insights and reporting.

CAW – Celito QS**May 2023 – May 2024***Senior Node.js Engineer**Hyderabad, India*

- Develop platform components and APIs using Node.js and PostgreSQL to support content and workflow management.
- Implement role-based access control using row-level security, strengthening data governance and compliance.
- Design workflow automation systems to streamline business processes and reduce manual intervention by 20%.
- Lead module ownership for LMS functionality, ensuring stability and scalability across releases.

CAW – Flipspaces**December 2022 – April 2023***Node.js Engineer**Hyderabad, India*

- Develop client portal modules and backend services using Node.js and Couchbase for design-tech platform.
- Implement authentication and identity management systems to secure user access and data.
- Design data models and APIs to support project management workflows across architectural teams.

CAW – Haptik**October 2020 – December 2022***Python / Django Engineer**Hyderabad, India*

- Develop chatbot solutions and API integrations using Django to enhance customer engagement for enterprise clients.
- Build middleware integrations with third-party platforms to enable seamless data exchange and automation.
- Create real-time analytics dashboards using Metabase to track performance metrics and user behavior.
- Collaborate with product and client teams to deliver scalable conversational AI solutions across industries.

CAW – Kaipulse**August 2020 – October 2020***React Developer**Hyderabad, India*

- Develop user and admin interface components using React to improve usability of project management platform.
- Enhance code quality by building reusable components and optimizing frontend performance.
- Integrate data visualization tools into dashboards to improve reporting capabilities.

Amazon**April 2017 – June 2019***Software Development Engineer I**Hyderabad, India*

- Enhance internal onboarding systems using Spring Framework, improving service integration flexibility across multiple pipelines.
- Resolve production issues and perform root cause analysis across invoice processing and inventory systems, reducing recurring defects by 20%.
- Implement monitoring and alerting using AWS tools to improve system reliability and incident response time.
- Collaborate with cross-functional teams to improve documentation, tooling, and operational processes for shared services.

Education

Raghu Institute of Technology**June 2015 – May 2019***Bachelor of Technology in Computer Science and Engineering**Vizianagaram, India***Languages**

- English – Full Professional Proficiency (C1)
- German – Intermediate Proficiency (B1)
