Dear Hiring Manager,

I am writing to express my interest in Graphic Designer or Visual Designer roles within your organization. With over 11 years of experience across branding, digital media, and product design, I bring a strong combination of creative thinking and technical design expertise.

In my current freelance role, I deliver end-to-end design solutions including logo design, branding, product visualization, and digital media content. I have successfully translated client requirements into impactful visual identities and marketing creatives, improving engagement and brand consistency across projects. I also create motion graphics and video content using After Effects and Premiere Pro to enhance digital storytelling.

Previously at Yez Yez Technologies, I designed branding assets, social media creatives, and marketing visuals that supported product promotions and increased audience engagement. I collaborated closely with marketing teams to develop design concepts aligned with business goals and ensured consistency through standardized visual guidelines.

Earlier, at Rak Ceramics in the UAE, I worked in product development and R&D, creating design visualizations and prototypes that supported manufacturing and product innovation. This experience strengthened my ability to work across cross-functional teams and translate technical specifications into compelling visual outputs.

I am skilled in Adobe Creative Suite, with a strong focus on visual storytelling, layout design, and concept development. My adaptability across freelance and corporate environments enables me to deliver high-quality creative solutions aligned with client and business needs.

I am particularly interested in opportunities in Germany due to its strong creative industry and focus on design innovation. With my experience and intermediate German proficiency, I am confident in contributing effectively to creative teams in a global environment.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my design expertise can contribute to your organization.

Sincerely,
Gopi Krishnamurthy
