Dear Hiring Manager,

I am writing to express my interest in opportunities in Mechanical Engineering, Production Engineering, or Machine Design roles. I bring over 9 years of professional experience across machine design, manufacturing, assembly operations, and industrial commissioning, along with a strong foundation in engineering principles and hands-on shop-floor execution.

In my recent role as a Mechanical Instructor at AMET Institute of Science and Technology, I have been responsible for delivering practical training in mechanical laboratories for Marine and Nautical cadets, teaching core subjects such as Fluid Mechanics and Solid Mechanics, and managing ISO documentation and departmental compliance. I have also coordinated academic and certification programs, ensuring structured execution and improved operational efficiency.

Previously, I worked as a Mechanical Engineer in industrial environments where I contributed to machine installation, commissioning, maintenance operations, and production planning. I have hands-on experience in designing special purpose machines using CAD tools, validating BOMs and technical drawings, and ensuring manufacturing accuracy through precision inspection instruments. My experience also includes hydraulics, pneumatics, assembly planning, vendor coordination, and production optimization.

Across my roles, I have consistently focused on improving process efficiency, reducing rework, and ensuring timely execution of engineering and production activities. I am also experienced in ISO documentation, quality control processes, and cross-functional coordination between design, production, and maintenance teams.

I am particularly interested in opportunities in Germany due to its advanced manufacturing ecosystem, precision engineering standards, and strong industrial innovation culture. I am open to relocation and eager to contribute my experience in machine design, production engineering, and industrial operations to a global engineering environment.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my background aligns with your organization's requirements.

Sincerely,

R. Saravana Kumar
