Subject: Application for Senior UiPath Developer

Dear Hiring Manager,

With over seven years in automation and six years of hands-on UiPath delivery, I'm excited to apply for the Senior UiPath Developer / RPA Solution Architect role at your organization. I specialize in scalable, audit-compliant automation frameworks. **I meet the criteria for EU Blue Card sponsorship.** I've aligned automation governance with German audit and data protection standards. Fluent in English (C1) and proficient in German (B1), with intermediate working proficiency.

At Innova Solutions, I lead the design and implementation of enterprise-grade automation standards, mentor engineers through structured code reviews, and engineer modular RE-Framework assets and Orchestrator configurations. These practices have **reduced manual effort by 40% and run costs by 30% while improving release reliability.** Previously, at **O2F Info Solutions**, I implemented dynamic multi-bot execution and monitoring that improved SLA adherence by 30% on high-volume processes.

My experience spans discovery, PDD/SDD documentation, gated change control and hyper care support. Having optimized 15+ client processes using Document Understanding, I collaborate closely with SMEs, QA and operations in agile environments and align designs with audit, security and data protection expectations in German/EU contexts.

I hold a Bachelor of Engineering along with certifications including [UiARD](#) and [Agentic Automation Associate](#). My technical toolkit includes UiPath Studio and Orchestrator, DU, C# and VB.NET, REST APIs, SQL Server/MySQL and Azure. I'm also experienced in **Agentic Automation using Maestro, Autopilot, and Prompt Engineering**, and have led multiple proof-of-concept (POC) initiatives to validate automation feasibility and accelerate stakeholder buy-in. I bring pragmatic governance, measurable outcomes for throughput and stability, and clear stakeholder communication.

I would welcome the opportunity to contribute to your automation roadmap and discuss how my experience can support your strategic goals. Thank you for considering my application. Upon confirmation of the role, I will be required to serve a two-month notice period with my current employer.

Yours sincerely,
Chaya Kumari B.
