Dear Hiring Manager,

I am applying for **Sales Manager or Inside Sales Lead** roles in Germany. I bring 13+ years in consultative sales and revenue execution, with full-cycle ownership across discovery, qualification, negotiation, objection handling, and closing. I build predictable pipeline rhythm through disciplined forecasting, stage hygiene, and consistent follow-ups, while coaching teams to improve conversion and target attainment.

In my current **Deputy Manager role at Infinium Developers**, I drive lead-to-close execution for residential sales and manage a monthly pipeline of 25 active prospects. I run structured deal reviews and follow-up cadences that reduce slippage by 15% and improve run-rate accuracy. I also strengthen broker and referral channels through systematic partner outreach, increasing partner-sourced leads by 20%. This execution has been recognized with a Top Sales Performer award for financial year 2024-2025, and I sustain a 5:1 lead-to-booking conversion ratio by tightening negotiation and documentation readiness.

Previously at G SQUARE Realtors, I owned lead-to-close execution for plotted development sales and built consistent close plans through pipeline governance and coaching. On the challenging Hillview project, I **sustained an average 20% monthly conversion by tightening qualification**, improving follow-ups, and optimizing partner routing. This helped exceed **annual targets by 25% through conversion playbooks** and disciplined execution. Across Casagrand Builders and KSK Property Developers, I built inbound-to-close workflows, increased qualified lead flow through cold calling and networking, and expanded referral channels to drive consistent pipeline contribution.

I align well with **Germany-based sales leadership expectations: forecast discipline, pipeline governance, KPI reporting, and cross-functional coordination with CRM and operations teams**. I bring hands-on leadership in deal strategy and coaching, plus strong channel execution through brokers and referrals. These skills translate well to DACH inside sales environments where process rigor, documentation readiness, and customer trust matter.

I am open to relocate to Germany and would welcome the opportunity to discuss how I can strengthen your forecasting accuracy, conversion consistency, and sales execution cadence.

Sincerely,
Gokul Sadasiv
