Summary

Senior Generative AI Engineer with about 9.5 years of experience across telecom, healthcare, and workforce platforms. Designs and ships LLM and RAG solutions for incident triage, knowledge retrieval, and conversational support on top of existing data and workflows. Connects data engineering, automation, and machine learning so prototypes move into stable production using Python, Azure, plus CI and CD pipelines. Partners with product owners and domain experts to convert tickets and manual steps into measurable gains in handling time and error rate. Open to roles in Germany that build Gen AI features and AI assisted automation at scale.

Core Skills

- **Gen AI and NLP:** Large Language Models, Natural Language Processing, RAG pipelines, retrieval augmented generation, prompt engineering, DistilBERT, text classification and clustering, semantic search, embeddings
- **Orchestration:** LangChain, LangGraph, Agentic AI, CrewAI, internal chatbots for support and automation
- **Data and Analytics:** Python, SQL, Teradata, PostgreSQL, Tableau, ETL with Informatica IICS Cloud, data mapping, data cleansing, data quality controls
- **Automation and RPA:** Workflow automation, ticket automation, incident automation, Blue Prism, Automation Anywhere, Power Automate, report automation, catalog data management
- **Cloud and DevOps:** Azure, Azure DevOps, Kubernetes EKS, CI and CD for ML, Jupyter Notebook, PyCharm, VS Code, Jira
- **Domains:** Telecom operations, US healthcare claims and compliance, workforce and scheduling for UKG, enterprise IT service management

Experience

Accenture India (ATCI)

January 2023 - Present

Automation and AI Enablement Specialist

Bengaluru, India

- Own Gen AI and automation solutions that support ticket triage, knowledge search, and reporting for telecom and workforce teams.
- Engineer DistilBERT ticket clustering, automatic routing models, and LangChain based RAG flows with vector stores on telecom runbooks.
- Lift routing accuracy to about 90% and cut repetitive triage time by about 20% on recurring incident patterns.
- Deploy chatbots with Streamlit and Claude plus RPA for catalog data and German reports using Blue Prism, Power Automate, and Azure DevOps.

Anthem Inc

November 2019 - January 2023

Senior Data Analyst

India

- Led analytics for payment integrity and emergency claims programs across multiple US states in a major health plan.
- Built SQL and Tableau views with data quality checks that profile claim volumes, denial reasons, and recovery pipelines for review.
- Automated payment verification steps that recovered about USD 380K per year and reduced manual checks across regions.
- Analyzed CA inpatient emergency patterns that informed policy changes and unlocked USD 5.9M yearly savings with clinical, network, and finance partners.

*Systems Engineer**India*

- Supported core AT and T data platforms that process daily inbound and outbound billing and usage feeds for customers.
- Delivered impact analysis, technical designs, and code changes while keeping modules stable through system and integration tests.
- Investigated incidents across multiple services, traced logs and data flows, and helped fix root causes before release windows.

Projects

Salesforce Customer Query Chatbot**India**

- Designed Salesforce customer query chatbot to surface similar historical cases for frontline support staff.
- Used vector search on prior tickets and responses with Python integration so agents can ask natural language questions.
- Reduced manual case lookup time and cut repetitive query volume for the support queue on frequent topics.

UKG Data Pipeline Automation**India**

- Created UKG workforce data automation to keep HR and payroll feeds consistent across upstream systems.
- Built SQL and Python pipelines with IICS and Salesforce integration to map, cleanse, and load scheduling records.
- Improved data readiness for downstream reports and reduced ad hoc manual fixes on workforce and payroll metrics.

Education

Vemana Institute of Technology**2011 - 2015***Bachelor of Engineering in Electronics and Communication**Bangalore, India***BGS PU College, Malur****2009 - 2011***Pre University Course**Malur, India*

Awards

- ACE Award for outstanding automation delivery across Deutsche Telekom hubs.
- Individual Contribution Award for high impact Gen AI and automation solutions.
- Recognized for multi country scalable automation frameworks with measurable cost savings.

Languages

- English – Full Professional Proficiency (C1)
- German – Elementary Working Proficiency (A2, learning)
