Dear Hiring Manager,

I am an SAP ABAP Developer with 5+ years of experience delivering end-to-end RICEF/OData/Form solutions across ECC and HANA. I have supported finance, HCM, SD, MM, BI/BW, and real-estate processes, and I'm known for robust authorization design, PI/PO integrations, and performant ALV/reporting that reduce manual effort and strengthen audit readiness. I am comfortable gathering requirements, designing and developing objects, unit testing, and releasing to production with clean documentation that aligns to EU/Germany delivery norms.

In my current HCM engagement at APCFSS, I implemented a new authorization object/class that reduced unsecured access by 30% across key t-codes, built Adobe payroll forms and drivers that cut monthly prep time by 40%, and delivered SEGW OData for controlled data correction that lowered ticket volume by 20%. I also implemented an SPROXY-based PI/PO interface that improved cross-system reliability and reduced reprocessing by 25%.

Previously with Invenio Business Solutions, I supported real-estate and public-sector programs by modeling Z-tables for land/rental masters, developing a BAPI + Excel uploader that reduced onboarding errors by 35%, and exposing OData for deed create/change flows that decreased rework by 20%. I stabilized DMS attachments and screen enhancements (-25% incidents) and, in a BI/BW context, built extract/reload utilities and published OData to third-party portals to standardize downstream consumption. Earlier at Wipro (Redington), I delivered multiple RICEF objects for HR/Payroll, supported ECC→HANA moves, enforced authority checks in ALV, and created Smart Forms that accelerated payroll statements by 40%.

I bring hands-on expertise in ABAP, RICEF, Adobe/Smart Forms, SEGW/OData (CRUD, search helps, enable/disable logic), BAPIs, Z-tables, Excel uploaders, and SAP↔Java integrations, plus Jira/ServiceNow and version control; working German (C1) and GDPR-aware documentation enable EU compliance, change control, and stakeholder communication, open to relocating to Germany and supporting on-site or remote models.

Sincerely,
Shaik Sharook
