Summary

Results-driven E-commerce Operations and Customer Support professional with 3+ years of experience across logistics SaaS, cross-border e-commerce, and global banking BPO. Specializes in L1/L2 operations support, escalation management, reverse logistics process design, and analytics-driven SLA governance. Experienced in diagnosing operational and technical issues using CRM platforms, ERP event logs, API validation, and Power BI reporting to stabilize service quality. Currently supporting Tier-1 China transporters and selected for a US onsite engagement to operationalize scalable undeliverable returns networks for international logistics operations.

Core Skills

- **E-commerce & Logistics Operations:** Omnichannel support, L1/L2 troubleshooting, SLA governance, cross-border logistics, reverse logistics.
- **Process & Operations Design:** SOP design, process standardization, incident analysis, root cause analysis, continuous improvement.
- **Tools & Platforms:** Zoho Desk, Zendesk, Salesforce, ERP systems, Postman, SoapUI, Microsoft Office.
- **Analytics & Reporting:** Power BI dashboards, Excel analysis, KPI tracking, backlog and SLA risk reporting, basic SQL.
- **Stakeholder Management:** International customer communication, carrier coordination, cross-functional collaboration.
- **Documentation & Quality:** Knowledge base management, audit readiness, compliance-aware operations.

Experience

Quantum ID Technologies

November 2023 - Present

Senior Analyst, E-commerce Operations

Pune, India

- Own end-to-end operations support for a logistics SaaS platform, ensuring SLA stability for international B2B customers.
- Diagnose operational and technical issues using CRM workflows, ERP event logs, and API testing tools for escalations.
- Optimize Power BI & Excel dashboards for volume and root-cause tracking, reducing incidents and escalations by 20%.
- Serve as primary operations contact for Tier-1 carriers SF Express and Yanwen Express, handling 45K parcels/day.
- Selected for US onsite assignment to operationalize a scalable undeliverable-returns process for cross-border e-commerce.
- Design reverse-logistics network linking failed last-mile deliveries to shippers with clear ownership and visibility.
- Plan return warehouse hubs using volume forecasting, capacity modeling, & SOP alignment with US teams.
- Coordinate product, engineering, carrier, and warehouse stakeholders to ensure SLA compliance and scalable rollout.

Full Potential Solutions

November 2022 - October 2023

Global Customer Care Executive

Pune, India

- Delivered high-volume omnichannel support for global banking and fintech clients across the US, UK, and Africa.
- Performed KYC checks, document validation, and dispute triage with evidence-based CRM documentation.
- Accelerated fraud investigations and dispute resolution, reducing chargebacks by 10% through precise escalation.
- Streamlined call flows and FAQs, achieving 8% AHT reduction and higher first-contact resolution rates.

- Provided L1 customer support for billing, access, and account issues across the US, AU, and NZ markets.
- Resolved email and chat tickets using SOP-driven workflows while maintaining audit-compliant quality standards.
- Improved higher-tier resolution efficiency by escalating technical issues with clear logs and reproduction steps.
- Consistently met daily productivity targets while sustaining quality KPIs and compliance benchmarks.

Projects

Reverse Logistics Network Optimization (US Onsite Assignment) 2024

- Built a standardized undeliverable returns model linking last-mile failures to shippers with defined ownership and tracking checkpoints.
- Planned warehouse return hubs including volume forecasting, capacity planning, and SOP alignment.
- Implemented accumulation & transfer hub strategy to reduce handling complexity and transit delays.
- Embedded SLA control mechanisms, escalation paths, and exception workflows to ensure scalable execution.

Logistics & Support Analytics Dashboards

- Built dashboards integrating ticket data, delivery events, and finance inputs for end-to-end visibility.
- Tracked SLA breaches, delivery delays, and backlog trends using CRM exports, ERP logs, and Excel models.
- Enabled supervisors to optimize staffing decisions and reduce backlog and late deliveries across operations.

Education

Government First Grade College, T. Narsipura

August 2016 - April 2019

Bachelor of Computer Science

Karnataka, India
