Summary

Java backend engineer with 4+ years of experience in enterprise-grade backend systems and microservices architecture. Specialized in Spring Boot, Hibernate, RESTful API design, and distributed system development. Experienced in AWS cloud deployments, Docker, Kubernetes, and CI/CD pipelines. Delivered performance optimization in high-traffic backend services in Agile environments. Strong experience in scalable system design and event-driven architectures.

Core Skills

- **Programming Languages:** Java (8, 17, 21), Python, SQL
- **Frameworks:** Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate, Servlet
- **Web Technologies:** Angular, React, TypeScript, HTML, CSS, RESTful APIs, JSON, XML
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Tools & Productivity:** Postman, Swagger, Git, GitHub, Jira, Maven, Splunk, Grafana, SonarQube
- **Cloud & DevOps:** AWS, Azure, Docker, Kubernetes, Jenkins, CI/CD Pipeline
- **Backend Architecture:** Microservices, JWT Authentication, API Gateway, Logging (SLF4J, Logback)
- **Testing & Quality Assurance:** JUnit, Mockito
- **Messaging & Event Streaming:** Apache Kafka
- **Methodologies & Emerging Tech:** Agile/Scrum, Networking, Linux, AI Tools (GitHub Copilot, Spring AI Developer, LangChain, LangGraph)

Experience

Wissen Technology

August 2025 – February 2026

Software Engineer

Bengaluru, India

- Develop interview automation features for InterviewNinja platform using Java 17/21, Spring Boot and REST APIs to streamline internal hiring workflows and improve delivery efficiency 10%.
- Design and implement microservices architecture using Docker, Kubernetes and Linux environments to enable scalable and containerized backend deployments across teams.
- Collaborate with cross-functional engineering teams to integrate cloud-native services and improve system modularity through service decomposition and API standardization.
- Accelerate development cycles by using GitHub Copilot and AI tools such as LangChain and LangGraph while maintaining code review standards and unit test coverage.
- Support continuous improvement initiatives by applying newly learned backend and cloud concepts to enhance system reliability and maintainability.

AKHM Software Solutions Pvt Ltd

January 2022 – July 2025

Software Engineer

Bengaluru, India

- Develop RESTful APIs and microservices using Java 8/17, Spring Boot and Spring Data JPA to support high-volume e-commerce and booking systems with improved scalability 60% response time gain.
- Implement JWT-based authentication and authorization using Spring Security to secure user management, booking and product services across distributed architecture.
- Optimize backend performance by introducing filtering, sorting, pagination and multi-threading, reducing API response latency from 600ms to 350ms under peak load conditions.
- Design MySQL database schemas using Hibernate/JPA with indexing and query optimization to improve data retrieval efficiency and reduce query timeouts during peak traffic.
- Develop Kafka-based asynchronous event processing for booking and notification workflows, improving system reliability and decoupling service dependencies in production.
- Deploy and maintain cloud infrastructure using AWS (EC2, S3, RDS) and CI/CD pipelines (Jenkins) while implementing Splunk, Grafana and SonarQube for monitoring and code quality governance.

Projects

Interview Ninja - Internal HR Automation Platform | Wissen Technology | Bengaluru, India

- Developed internal interview scheduling and evaluation system using Java and Python to streamline HR workflows and improve process efficiency.
- Designed scalable microservices architecture to support modular backend services and improve system maintainability and performance.
- Containerized application using Docker and deployed services on Kubernetes to ensure consistent and reliable production environments.
- Integrated AI-assisted development workflows using LangChain, LangGraph and GitHub Copilot to accelerate delivery and improve code quality.

RTS Auto Parts E-Commerce Platform | AKHM Software Solutions Pvt Ltd | Bengaluru, India

- Developed scalable RESTful microservices using Java 8/17, Spring Boot and Spring MVC following layered architecture (Controller, Service, Repository).
- Implemented JWT-based authentication and authorization using Spring Security to secure distributed e-commerce services.
- Designed event-driven architecture using Apache Kafka for booking events and notifications, improving system decoupling and scalability.
- Optimized database performance using MySQL and Hibernate/JPA with indexing, query tuning and pagination to improve response time 60%.
- Built CI/CD pipelines using Git, Maven and Jenkins/GitHub Actions to automate build, test and deployment processes in Agile environment.

Hotel Booking Platform | AKHM Software Solutions Pvt Ltd | Bengaluru, India

- Developed REST APIs using Java, Spring Boot and Hibernate to support hotel booking and management workflows.
- Implemented caching and asynchronous processing using Kafka to improve system responsiveness and throughput.
- Designed secure backend using Spring Security, OAuth2 and JWT authentication for role-based access control.
- Performed unit and integration testing using JUnit and Mockito to ensure code reliability and reduce production defects.
- Monitored applications using Log4j/SLF4J and ELK stack to improve observability and production debugging efficiency.

Education

Don Bosco Institute of Technology
B.E., Computer Science and Engineering

2019 – 2023
Bengaluru, India

Certifications

- Java 8/17/21, DBMS, Python, Docker, Kubernetes, Kafka, Linux, GitHub Copilot, LangChain, LangGraph
- In progress: React, Snowflake, AWS, Azure

Languages

- English – Full Professional Proficiency (C1)
- Hindi – Full Professional Proficiency (C1)
- German – Intermediate Working Proficiency (B1)
